in the Western hemisphere recognize the general description of this creature. What few may realize however is that the Sasquatch is not unique to North America. Or at least stories of mysterious bipedal hominids are not. From the mountainous regions of Nepal to the wild outback of Australia, tales of such beings have existed throughout history. In many cases, the descriptions of these creatures seem to match Bigfoot. So then a few questions naturally arise: Are these all part of a singular, long-lost species of great ape, or are they separate beings with different genetic lineages? How similar are they to each other, where do they live, and is there any evidence of their existence? We will explore the answers to these questions and many more in this book.
