

The Harvard Business School Center for Digital Learning has developed this checklist to help you design an effective hybrid workplace model.

# The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed for the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the employees you want to attract and retain. This includes understanding their work preferences, their needs, and the challenges they face.

The way to build a hybrid work model is to start with the people. Understand their needs and preferences, and then design a hybrid work model that meets those needs and preferences.

How do you design a hybrid work model that meets the needs and preferences of the people you want to attract and retain? This is the first question you should ask. The answer to this question will determine the rest of the hybrid work model.
