Teaching Mathematics In Multilingual Classrooms:

Teaching and Learning Mathematics in Multilingual Classrooms Anjum Halai, Philip Clarkson, 2015-12-17

Contemporary concerns in mathematics education recognize that in the increasingly technological and globalized world with concomitant change in population demographics e.g. immigration, urbanization and a change in the status of languages e.g. English as a dominant language of science and technology, multilingualism in classrooms is a norm rather than an exception. Shifts in perspective also view language not simply as an instrument for cognition with all learners equipped with this instrument in service of learning, although clearly in the classroom that remains of importance. Rather, it is now also being acknowledged that language use is inherently political, so that the language that gets official recognition in the classroom is invariably the language of the powerful elite or the dominant societal language or, in the case of post-colonial contexts, the language of the colonisers. From this socio-political role of language in learning, quite different issues arise for teaching, learning and curriculum for linguistically marginalized learners than that of cognition e.g. immigrants, second language learners, etc. Policies on language in education are being considered and re-considered with specific reference to mathematics teaching and learning. Given the policy environment globally, the proposed publication is timely. This edited collection draws on recent emerging insights and understandings about the approaches to improving policy and practice in mathematics education and mathematics teacher education in multilingual settings. It presents and discusses critically examples of work from a range of contexts and uses these examples to draw out key issues for research in education in language diverse settings, including teaching, learning, curriculum and fit, these with appropriate policy and equity approaches. With contributions from all over the world, especially novice researchers in low income countries, this book is a valuable resource for courses in Mathematics Education and related social sciences, both at the graduate and undergraduate levels, as well as for students of international development.

Teaching Mathematics in Multilingual Classrooms J.B.

Adler, 2001-06-30 The author captures three inter-related dilemmas that lie at the heart of teaching mathematics in multilingual classrooms: code-switching, mediation and transparency. She provides a sharp analysis and strong theoretical grounding, pulling together research related to the relationship between language and mathematics, communicating mathematics and mathematics in bi-multilingual settings, and offers a direct challenge to dominant research on communication in mathematics classrooms.

Multilingualism in Mathematics Classrooms Richard Barwell, 2009

Learning and teaching mathematics in multilingual, bilingual or second language settings can be challenging. This collection explores the complex issues that arise in multilingual mathematics classrooms in Europe, South Asia, North America and Australia. Each contribution draws on recent research to offer new insights into the relationship between language learning and mathematics.

Researching Mathematics Education in Multilingual Contexts Richard Barwell, Philip Clarkson, 2004 Conducting research in multilingual contexts leads to a number of theoretical and methodological challenges Classical research methods may be hard to apply leading to the development of original approaches to research In particular issues arise concerning validity interpretation and the relationship between language mathematics and mental processes To tackle these issues researchers in this field have drawn widely on theories from a range of disciplines including psychology linguistics anthropology and sociology as well as education A further challenge for researchers is to draw on their work to inform the practice of teaching mathematics The main aim in this Research Forum is to explore the impact of multilingualism on three inter related issues mentioned above theory methodology and teaching mathematics in multilingual contexts The following papers are included in this forum 1 Working with Theories from Outside Mathematics Education Marie Hofmannova Jarmila Novotna and Judit Moschkovich 2 Multilingual Contexts for Teaching Mathematics Philip C Clarkson 3 Teaching Mathematics in Multilingual Classrooms Anjum Halai 4 Questions of Visibility Richard Barwell 5 Mathematics Discourse as Performance Perspectives from Linguistic Anthropology Susan Staats Individual papers contain references For complete proceedings see ED489178

Modeling School Mathematics Teaching in Initial Teacher Training Colleges for Multilingual Classrooms Nancy Chitera, 2011 In this article the author presents a discussion of how mathematics teacher educators model school mathematics teaching in initial teacher training colleges as they prepare the student teachers to teach mathematics in multilingual classrooms in Malawi In particular the article examines the instructional practices that mathematics teacher educators produce as they train student teachers who are going to teach mathematics in multilingual classroom The study subjects were four mathematics teacher educators from two different initial teacher training colleges in Malawi The research instruments included classroom observations pre observation and reflective interviews and focus group discussions Data were collected during their residential sessions in January and February 2007 Using three levels of critical discourse analysis Fairclough 1989 2003 the research findings indicate that the mathematics teacher educators demonstrated the procedural discourse in all their instructional practices produced in their college mathematics classrooms Furthermore the results showed that some of the discourse practices being displayed in a college mathematics classroom mutually reinforce the discourses that the mathematics teacher educators display for school mathematics teaching in a multilingual mathematics classroom The study recommends that to assist the student teachers a certain action needs to be taken by the mathematics teacher educators This research was
