Use of Authentic ICT Tasks in New Zealand Secondary Science Classes Geraldine Antoinette Victor, 2017 It has been argued that it is not the digital device that one uses but how the device is used that allows students to reap the most benefit Cox Eng 2005 Higgins 2003 Mwalongo 2011 Passey Rogers Machell McHugh Phillips Somekh 2008 In New Zealand NZ the Ministry of Education MoE has been promoting the use of Information and Communication Technology ICT in the curriculum for nearly three decades This Thesis is a personal journey to discover what authentic ICT tasks are and to investigate how widespread the knowledge and incorporation of authentic ICT tasks are in Secondary Science teachers practice in New Zealand NZ Utilising the Substitution Augmentation Modification Redefinition SAMR theoretical model which offers a method of evaluating the impact of technology based teaching and learning this study used quantitative methodology to attempt a stock take of the ways in which ICT is used in NZ Secondary Science classes ICT tasks at the Modification and Redefinition levels were considered authentic as these tasks could not be done without the aid of ICT and also allow for the integration of 21st century skills creativity collaboration communication and critical thinking The simple

descriptive statistical analysis of the data from this study showed that while all participants used some form of ICT in the classroom less than half used ICT at the Modification and Redefinition level The data also suggested that the participants attitude towards the integration of ICT in enhancing their students learning were generally positive However the data showed that though there is interest and motivation among the participants to improve their use of ICT in classrooms the required effective professional development and learning opportunities for teachers are lacking This Thesis discusses reasons why authentic ICT use is low and provides recommendations towards a higher level of its incorporation in the teaching programme Key words Information and Communication technology ICT in Secondary Science education Impact of ICT on student learning Substitution Augmentation Modification Redefinition SAMR Students ICT skills 21st century skills ICT PLD for teachers

Using ICT in Inquiry-Based Science Education Geraldo W. Rocha Fernandes, António M. Rodrigues, Carlos Alberto Rosa Ferreira, 2019-05-21 This book analyzes the main Information and Communication Technologies ICT used in science education and the main theoretical approaches that support science education mediated by ICT in order to show how digital technologies can be employed in Inquiry Based Science Education It presents the results of a comprehensive review of studies focusing both on the use and effects of digital technologies in science education and on the different theoretical approaches that support the use of ICTs in science teaching By doing so the book provides a useful summary of the current research in the field and a strong analysis of its limitations It concludes that there are few studies that report strategies and didactics for the practical use of ICT in science classes and that the use of ICT in science education can't be seen as an isolated action without a theoretical basis to support it Based on these conclusions the volume identifies the main ICTs used in inquiry activities the main steps in inquiry activities used in science education and their approaches to the use of ICT It shows that the use of ICT in Inquiry Based Science Education allows students to develop more active work styles improved attitudes towards science better conceptual and theoretical understanding improved reasoning better modelling capabilities and improved teamwork along with improvements in other abilities Using ICT in Inquiry Based Science Education will be a valuable resource for science teachers and science teacher educators looking for an introductory text that presents an overview of the scientific research analyzing the implementation of digital technologies in science teaching and that provides useful insights to all educators interested in using digital technologies to introduce their students in the world of scientific inquiry and research

Computer Studies Curriculum Implementation in Secondary Schools in Mufumbwe District in Zambia. Success and Challenges Collins Masumba, 2019-11-12 Master's Thesis from the year 2019 in the subject Didactics Computer Science grade B University of Zambia language English abstract The purpose of this study was to investigate the Computer Studies Curriculum implementation in rural secondary schools of Zambia's Mufumbwe district This study was guided by the following questions What facilities and equipment are available for the implementation of the Computer Studies Curriculum in selected secondary schools of Mufumbwe district Are there enough qualified teachers to enhance the

effective implementation of the Computer Studies Curriculum How appropriate are the teaching methodologies in the implementation of the Computer Studies Curriculum What are the head teachers teachers learners and parents views on the teaching of Computer Studies Globalisation and technological development in the world have accelerated and created a new global economy fuelled by information and driven by innovations One way in which information spreads is by the use of computers In the 2013 revised curriculum the Ministry of General Education in Zambia introduced Computer Studies into the education system The few studies in this area were done in urban areas The rural setting has been ignored as regards to implementation of Computer Studies Curriculum Mufumbwe district being a rural setting is a special case especially in a Zambian context considering development trends in Zambia Specifically the study sought to establish the availability of facilities and equipment for the implementation of Computer Studies find out the availability of qualified Computer Studies teachers examine the appropriateness of teaching methods and establish the views of Head Teachers teachers learners and parents on the implementation of Computer Studies in Secondary Schools in Mufumbwe district Lack of computer skills among learners in Zambia may hinder technological advancement and fail to achieve the national ICT policy goal of 2007 which introduced CS as an enabler in a diversified and export oriented economy capable to improve livelihoods and protect the vulnerable through service delivery and provide an efficient and effective public sector Further Zambia may fail to achieve the vision 2030 whose vision is to have a prosperous middle income nation through having a technologically proficient fully able to adapt innovate and invest using its human and natural resources It was therefore important that this study was conducted in order to investigate how CSC was being implemented in rural secondary schools in Mufumbwe district
