Computing Attitude and Affect in Text: Theory and Applications James G. Shanahan, Yan Qu, Janyce Wiebe, 2006-01-17
Human Language Technology HLT and Natural Language Processing NLP systems have typically focused on the factual aspect of content analysis Other aspects including pragmatics opinion and style have received much less attention However to achieve an adequate understanding of a text these aspects cannot be ignored The chapters in this book address the aspect of subjective opinion which includes identifying different points of view identifying different emotive dimensions and classifying text by opinion Various conceptual models and computational methods are presented The models explored in this book include the following distinguishing attitudes from simple factual assertions distinguishing between the author's reports from reports of other people's opinions and distinguishing between explicitly and implicitly stated attitudes In addition many applications are described that promise to benefit from the ability to understand attitudes and affect including indexing and retrieval of documents by opinion automatic question answering about opinions analysis of sentiment in the media and in discussion groups about consumer products political issues etc brand and reputation management discovering and predicting consumer and voting trends analyzing client discourse in therapy and counseling determining relations between scientific texts by finding reasons for citations generating more appropriate texts and making agents more believable and creating writers aids The studies reported here are carried out on different languages such as English French Japanese and Portuguese Difficult challenges remain however It can be argued that analyzing attitude and affect in text is an NLP complete problem

Selected Lexical and Grammatical Issues in the Meaning-text Theory Leo Wanner, Igor Aleksandrovi? Mel?uk, 2007-01-01 The Meaning Text Theory MTT is a lexicon centred and dependency based theory for the description of language using a holistic model that incorporates semantics syntax morphology and lexis This volume prepared on the occasion of Igor Mel'uk's 70th birthday offers a cross section of the current advances in MTT and its applications The first part of the book focuses on lexical phenomena that are still largely neglected in mainstream linguistics sound symbolism as manifested by ideophones and idiosyncratic lexical relations as manifested by lexical functions LFs In particular LFs are addressed from different angles including the introduction of new standard LFs the argument structure and semantic decomposition of lexical relations captured by LFs automatic recognition of LF instances in corpora and the use of LFs in terminology and natural language processing The second part of the book deals with such prominent model oriented issues as semantic paraphrasing in MTT the role of phrase structure in MTT and syntactic analysis within MTT *Catalogue* University of Minnesota, 1896

College,1907 **Reading Curriculum Theory** William M. Reynolds,1989 Reading Curriculum Theory The Development of a New Hermeneutic is a study of curriculum theory texts of the 1980s Focusing on three divisions within the theoretical traditions of the field the conservative the reconceptualist and the reproductionist the book provides a hermeneutic reading of specific texts within each tradition The book relies heavily upon the interpretation theory of Paul Ricoeur and discusses Ricoeur s theoretical works The book reveals and demonstrates that the ultimate aim of interpretive reading or the hermeneutic process is enhanced self understanding *Dada's Manifestos and Peter Bürger's Theory of the Avant-garde* Marco Hompes,2011-01-18 Essay from the year 2010 in the subject Art Art Theory General grade 8 5 University of Amsterdam Cultural Analysis course Art as an Institute and its Critique language English abstract 1 Introduction The avant garde intends the abolition of autonomous art by which it means that art is to be integrated into the praxis of life At least this is what Peter Bürger states in his groundbreaking book Theory of the Avant garde In the book Bürger gives some examples that shall acknowledge and prove his theory e g Ren Magritte or Marcel Duchamp It is clear that such examples need to stay eclectic in order to fit the developed theory In the following Bürger s text will be put to the acid test by analysing some avant garde works through the eyes of Peter Bürger and it shall be examined if specific programmatic avant gardist works go well with his theory The manifestos by the first Dadaists in Zürich seem to be extremely useful for this attempt Their productions haven t been canonised yet and have served as an example for further Dadaistic productions in Germany the USA the Netherlands Romania Georgia Poland etc They excessively produced manifestos and declared their ideals and plans However these declarations always remain a bit opaque as they avoid clear statements and explicitly write absurd In their works the Dadas often make statements and shortly afterwards reject them again Tristan Tzara s manifestos are great examples of this kind of text therefore this paper focuses on his writings but will consider manifestos by Walter Serner thoughts by Marcel Janco or Hugo Ball as well Can Theory of the Avant garde be a key to excerpt meaning from the Dadaistic text production or do the manifestos go beyond Bürger s theory or even prove him wrong **1001 Questions and Answers on the Theory and Practice of Teaching** Benjamin Adams Hathaway,1886 *Annual Catalogue of the Agricultural and Mechanical College of Texas.
