Murphy, 2005-12-15T00:00:00+01:00 This volume examines the editing of specialised texts as practised by the Editing Unit at the Directorate General for Translation at the European Commission in Brussels Following a corpus-assisted approach it compares two comparable corpora of the same texts in their non-edited and edited versions Using quantitative techniques from corpus linguistics together with manual text analysis the author reflects on the types of revisions that are made of a formal grammatical and lexical nature and on some phraseological aspects of the edited texts The conclusions drawn are that the written English representing supranational organizations such as the European Union institutions continues to be norm-bound adhering to standard British English However traces of influences from other European languages in terms of false friends and certain grammatical phrases characterise the corpus of edited texts more than reference corpora of British English Similarly to translated language edited language is also found to be characterised by explicitation and simplification
