## **The Time Of Troubles:**

**The Time of Troubles** Sergeĭ Fedorovich Platonov, 1970 Sergei Feodorovich Platonov's *Time of Troubles* is a classic study of the years 1598-1613, a turbulent and decisive period in Russian history. Available for the first time in English, this work will be a valuable tool for students of the medieval as well as modern periods. Platonov himself, a tragic victim of the regimentation imposed on Soviet cultural life in the 1920s, was born in 1860 and attained immense public and professional recognition in Russia as a leading historian. In his work, he synthesized to a high degree two major traditions of Russian historiography: the St. Petersburg school, which emphasized the collection and rigorous use of primary sources, and the Moscow school, with its socioeconomic and geopolitical approaches. *Time of Troubles* represents the finished product of a lifetime spent in research, writing, and teaching. In broad terms, it treats nearly a century and a half of Russian history (1500-1648) in detail, scrutinizing developments in the Muscovite State from 1598 to 1613. Some of the major issues covered in this volume are the growing consolidation of Muscovite absolutism and the formation of a national state; the expansion of Muscovy to the west and southeast; the demise of the boyar class and the rise of the service gentry; the emergence of serfdom as the social basis of Muscovite society; the cataclysmic end of one dynasty, the House of Rurik, and the beginnings of another, the House of Romanov. For Platonov, who devoted most of his career as a scholar to the study of these dramatic years, the epoch marked nothing less than the great divide between medieval Muscovy and modern Russia, witnessing the downfall of an essentially patrimonial regime and its replacement, after fierce struggles, by a more modern state founded on a new constellation of social groups.

**The Life Cycle of Civilizations** Stephen Blaha, 2002 This book is an expanded version of *The Rhythms of History*, the book that made macro-history into a semi-quantitative science. New features include: 1. an appendix showing how the history of Mayan civilization conforms to the book's Theory of Civilizations, including the latest information from the newly discovered hieroglyphic texts at Dos Pilas, Guatemala; 2. an appendix on the sub-Saharan African civilization Great Zimbabwe, showing it fits the theory; 3. a comparison of the theory with Toynbee's observations, showing the many new features resulting from a quantitative theory; 4. numerous historic pictures and illustrations of the civilizations of mankind, including a number of newly found pictures from the nineteenth century; 5. a chapter describing the potentially disturbing implications of patterns in civilizations; 6. Are we free, and the implications for the Philosophy of History; and 6. expanded comments in many sections, such as the sections on the future of humanity, the role of China, and the Islamic West conflict. The book begins with a hard-hitting, tell-it-like-it-is chapter on the current international situation, with statements such as "The United States and Western civilization is now engaged in a small Vietnam-style war on a global scale at the time of this writing. This war is still in the early stages of development. The attack on the World Trade Center by Muslim terrorists may have the same significance for Western civilization that the Gothic invasion of Rome itself, in the prime of the Empire, the First Century AD, had for the future of Rome. They may be a premonition of things to come, not necessarily soon, but perhaps

in a few centuries The Goths returned three centuries later and remained as permanent conquerors Over the long term the West must free itself from a dependence on Muslim oil Muslim oil revenues are the fuel for the development of weapons of mass destruction by Iran and Iraq In the future they will supply the revenues of an expansionist Islam As the silk trade looted the Roman Empire of its gold and reduced its economy the trade in oil is looting the West of its prosperity and freedom of action The rise and fall of oil prices has a significantly greater effect on the American and world economy than the raising and lowering of interest rates by central banks The book then describes a theory of civilizations that led to these observations Currently unfolding events seem to be fulfilling the predictions which were made last year including the new North Korean threat that seems to be consistent with a predicted breakdown in Japan North Korea will create major problems with Japan As this is being written Japan is moving Aegis destroyers nearer to North Korea and preparing for defense THE EVENTS DESCRIBED IN THIS BOOK AND ITS PREDECESSOR APPEAR TO BE HAPPENING AS PREDICTED LAST YEAR According to Theory of Civilizations the basis of civilizations was laid with a genetic mutation found by Ding et al 40 000 years ago that created bold enterprising individuals who became the leadership group of civilizations a group that Toynbee called the creative minority When the world's climate became warmer and more stable 10 000 years ago the seeds of civilizations began to germinate Thus the origin of civilizations is tied to human genetics The book then shows that a long term social behavior pattern of mankind based on four generation trends causes civilizations to develop and oscillate in patterns of routs and rallies Civilizations rise and fall due to their internal human dynamics The theory of civilization is developed using equations and 68 diagrams that show a close detailed match between the theory and the actual history of all known Asian European and African civilizations over the last 5 500 years The theory projects the future of today's civilizations including the future of Western and Islamic civilizations It also successfully describes the interaction of barbarians and civilizations the interaction of two civilizations the impact of modern technology on civilizations it accounts for the Luddite reaction to the Industrial Revolution the impact of major environmental events on civilizations e g the collapse of Minoan civilization due to a volcanic eruption and the disintegration of civilizations It also accounts for the tremendous growth phases seen in many civilizations such as the building of the great pyramids in Egyptian civilizations Based on the theory fifteen new civilizations are identified including new prehistoric Chinese and Egyptian civilizations Having shown the success of the theory for earth civilizations it considers the form of extraterrestrial civilizations and calculates their impact on Western civilization should contact be established The book also shows the need for the colonization of space and nearby planets if mankind is to progress in the future The book analyzes the impact of the lengthening life spans of mankind on the future of civilizations Predictions are made for the state of the world for 2050 and 2100 A detailed understanding the past enables the theory of civilizations to make predictions for the future Defining Progress to be the sum of the world's civilizations the book shows that Progress seems to be approximately linearly increasing over the last 5 500 years A plot of Progress appears on the book

s cover shown on this web page together with the contributions of each civilization to Progress The vertical order of the civilizations in the plot is arbitrary Older civilizations tend to be lower in the plot The book is a tour de force that makes History a Science rather than a collection of random events It is the first detailed mathematical treatment of history Although the book contains mathematics it is intended for the general reader as well as the mathematically inclined There are copious verbal descriptions of the theory as well as many figures plotting the theory versus historical events A qualitative descriptive theory of civilizations is also presented that is like a Dow Theory of Civilizations [Russian Identities](#) Nicholas V. Riasanovsky,2005-09-29 This book investigates the question of Russian identity looking at changes and continues over a huge territory many centuries and a variety of political social and economic structures Its main emphases are on the struggle against the steppe peoples Orthodox Christianity autocratic monarchy and Westernization [Dostoevsky and the Catholic Underground](#) Elizabeth A. Blake,2014-04-30 While Dostoevsky s relation to religion is well trod ground there exists no comprehensive study of Dostoevsky and Catholicism Elizabeth Blake s ambitious and learned Dostoevsky and the Catholic Underground fills this glaring omission in the scholarship Previous commentators have traced a wide ranging hostility in Dostoevsky s understanding of Catholicism to his Slavophilism Blake depicts a far more nuanced picture Her close reading demonstrates that he is repelled and fascinated by Catholicism in all its medieval Reformation and modern manifestations Dostoevsky saw in Catholicism not just an inspirational source for the Grand Inquisitor but a political force an ideological wellspring a unique mode of intellectual inquiry and a source of cultural production Blake s insightful textual analysis is accompanied by an equally penetrating analysis of nineteenth century European revolutionary history from Paris to Siberia that undoubtedly influenced the evolution of Dostoevsky s thought [Reclaiming the Radical Economic Message of Luke](#) David D. M. King,2022-05-13 No canonical Gospel is more concerned with wealth and poverty than Luke A centuries long debate rages over just how revolutionary Luke s message is This book seeks to recover Luke s radical economic message to place it in its ancient context and to tease out its prophetic implications for today Luke has a radical message of good news for the poor and resistance to wealth God is shown to favor the poor championing their struggle for justice while condemning the rich and recommending a sweeping disposal of wealth for the benefit of the poor This represents a distinct break from the ethics of the Roman Empire and a profound challenge to modern economic systems Generations of interpreters have worked to file down Luke s sharp edges from scribes copying ancient manuscripts to early Christian authors to contemporary scholars Such domestication disfigures the gospel silencing its critique of an economic system whose unremitting drive for profit and economic growth continues to widen the gap between rich and poor while threatening life altering environmental change It is time to reclaim the bracing prophetic call of Luke s economic message that warns against the destructive power of wealth and insists on justice for the poor and marginalized [Historiography of Imperial Russia](#) Thomas Sanders,1999 A collection of recent work on historical consciousness and practice in late Imperial Russia Essays in Part I reexamine the

evolution of historical consciousness and practice in Russian academic history until the end of the historical ancient regime in 1929 In Part II eight chapters are devoted to individual Russian and Ukrainian historians Chapters in Part III examine the development of distinctive historical voices in the main non Russian cultural zones of the empire For students and non specialists Annotation copyrighted by Book News Inc Portland OR Events That Formed the Modern World Frank W. Thackeray, John E. Findling, 2012-05-31 This comprehensive five volume set contains readable essays that describe and interpret the most important global events since the European Renaissance some accompanied by related document excerpts and primary source materials What were the effects of the Age of Exploration on today s ethnic groups and social structure How did the development of moveable type pave the way for Facebook and Twitter Why is the Reformation so critical for understanding today s religious controversies This set will help readers answer these questions by exploring the most significant historical events of the modern world This five volume set covers times from the Renaissance to the present Each volume focuses on a specific historic period and examines 12 events within those time frames that changed the world Each entry provides an introduction that lays out factual material in a chronological manner an in depth essay interpreting the event s significance and an annotated bibliography of the most important current works on the topic Select entries are followed by primary sources pertaining to the event under consideration such as diary entries Targeted to both general readers as well as entry level university students this book also directly supports high school and undergraduate curricula allowing students to identify and contextualize events in order to think critically about their causes aftermath and legacy

**The Russian Empire 1450-1801** Nancy Shields Kollmann, 2017 Modern Russian identity and historical experience has been largely shaped by Russia s imperial past an empire that was founded in the early modern era and endures in large part today The Russian Empire 1450 1801 surveys how the areas that made up the empire were conquered and how they were governed It considers the Russian empire a Eurasian empire characterized by a politics of difference the rulers and their elites at the center defined the state s needs minimally with control over defense criminal law taxation and mobilization of resources and otherwise tolerated local religions languages cultures elites and institutions The center related to communities and religions vertically according each a modicum of rights and autonomies but didn t allow horizontal connections across nobilities townsmen or other groups potentially with common interests to coalesce Thus the Russian empire was multi ethnic and multi religious Nancy Kollmann gives detailed attention to the major ethnic and religious groups and surveys the government s strategies of governance centralized bureaucracy military reform and a changed judicial system The volume pays particular attention to the dissemination of a supranational ideology of political legitimacy in a variety of media written sources and primarily public ritual painting and particularly architecture Beginning with foundational features such as geography climate demography and geopolitical situation The Russian Empire 1450 1801 explores the empire s primarily agrarian economy serfdom towns and trade as well as the many religious groups primarily Orthodoxy Islam and Buddhism It

tracks the emergence of an Imperial nobility and a national self consciousness that was by the end of the eighteenth century distinctly imperial embracing the diversity of the empire s many peoples and cultures *The Time of Troubles* R.
