

# TRAUMA-INFORMED CARE:

## What does it look like?

@therecoverycenterusa

### Language and Communication

Helpers use non-judgmental and empathetic language. They avoid making assumptions about an individual's past experiences. For instance, instead of asking, "What's wrong with you?" they might ask, "What happened to you?"

### Providing Choices

In healthcare settings, offering choices to patients can be empowering. For example, allowing a patient to choose their meal preferences or the time of their therapy sessions gives them a sense of control.

### Sensory-Friendly Environments

Recognizing that sensory sensitivities can be triggered by trauma, trauma-informed care might involve providing calming sensory rooms or ensuring that lighting and noise levels are adjustable to individual preferences.

### Active Listening

Helpers actively listen to individuals without interrupting or rushing through appointments. They validate their feelings and experiences.

### Training and Self-Care

Healthcare staff are trained in trauma-informed care principles and are encouraged to practice self-care to prevent burnout. This ensures that they can provide the best possible care to their patients.

### De-escalation Techniques

In situations where patients may become agitated or distressed, trauma-informed care involves de-escalation techniques that prioritize safety and minimize re-traumatization.
