Understanding Genocide Leonard S. Newman, Ralph Erber, 2002-09-26 When and why do groups target each other for extermination How do seemingly normal people become participants in genocide Why do some individuals come to the rescue of members of targeted groups while others just passively observe their victimization And how do perpetrators and bystanders later come to terms with the choices that they made These questions have long vexed scholars and laypeople alike and they have not decreased in urgency as we enter the twenty first century In this book the first collection of essays representing social psychological perspectives on genocide and the Holocaust prominent social psychologists use the principles derived from contemporary research in their field to try to shed light on the behavior of the perpetrators of genocide The primary focus of this volume is on the Holocaust but the conclusions reached have relevance for attempts to understand any episode of mass killing Among the topics covered are how crises and difficult life conditions might set the stage for violent intergroup conflict why some groups are more likely than others to be selected as scapegoats how certain cultural values and beliefs could facilitate the initiation of genocide the roles of conformity and obedience to authority in shaping behavior how engaging in violent behavior makes it easier to for one to aggress again the evidence for a genocide prone personality and how perpetrators deceive themselves about what they have done The book does not culminate in a grand theory of intergroup violence instead it seeks to provide the reader with new ways of making sense of the horrors of genocide In other words the goal of all of the contributors is to provide us with at least some of the knowledge that we will need to anticipate and prevent future such tragic episodes

Genocide Larry

May,2010-02-26 Larry May examines the normative and conceptual problems concerning the crime of genocide Genocide arises out of the worst of horrors Legally however the unique character of genocide is reduced to a technical requirement that the perpetrator s act manifest an intention to destroy a protected group From this definition many puzzles arise How are groups to be identified and why are only four groups subject to genocide What is the harm of destroying a group and why is this harm thought to be independent of killing many people How can a person in the dock as an individual be responsible for a collective crime like genocide How should we understand the specific crimes associated with genocide especially instigation incitement and complicity Paying special attention to the recent case law concerning the Rwanda genocide May offers the first philosophical exploration of the crime of genocide in international criminal law **Genocide** Sean Sheehan,2005 Dicusses genocide with information about the causes of genocide arguments about genocide and dealing with genocide *Genocide and International Justice* Rebecca Joyce Frey,2009 Presents a guide to the issues of genocide and international justice including global and primary sources important documents research tools organizations and notable persons **The Postcolonial African Genocide Novel** Chigbo Arthur Anyaduba,2021-10-01 An Open Access edition of this book is available on the Liverpool University Press website and through Knowledge Unlatched In *The Postcolonial African Genocide Novel* Chigbo Anyaduba examines fictional responses to mass atrocities occurring in postcolonial Africa Through a comparative reading of novels responding to the genocides of the Igbo in Nigeria 1966 1970 and the Tutsi in Rwanda 1990 1994 the book underscores the ways that literary encounters with genocides in Africa s postcolonies have attempted to reimagine the conditions giving rise to exterminatory forms of mass violence The book concretizes and troubles one of the apparent truisms of genocide studies especially in the context of imaginative literature that the reality of genocide more often than not resists meaningfulness Particularly given the centrality of this truism to artistic responses to the Holocaust and to genocides more generally Anyaduba tracks the astonishing range of meanings drawn by writers at a series of temporal spatial historical cultural and other removes from the realities of genocide in Africa s postcolonies a set of meanings that are often highly specific and irreducible to maxims or foundational cases The book shows that in the artistic projects to construct meanings against genocide s nihilism writers of African genocides deploy tropes that while significantly oriented to African concerns are equally shaped by the representational conventions and practices associated with the legacies of the Holocaust
