Hagberg, 2019-11-15 This exciting new edited collection bridges the gap between narrative and self understanding The problem of self knowledge is of universal interest the nature or character of its achievement has been one continuing thread in our philosophical tradition for millennia Likewise the nature of storytelling the assembly of individual parts of a potential story into a coherent narrative structure has been central to the study of literature But how do we gain knowledge from an artform that is by definition fictional by definition not a matter of ascertained fact as this applies to the understanding of our lives When we see ourselves in the mimetic mirror of literature what we see may not just be a matter of identifying with a single protagonist but also a matter of recognizing long form structures long arc narrative shapes that give a place to and thus make sense of the individual bits of experience that we place into those structures But of course at precisely this juncture a question arises do we make that sense or do we discover it The twelve chapters brought together here lucidly and steadily reveal how the matters at hand are far more intricate and interesting than any such dichotomy could accommodate This is a book that investigates the ways in which life and literature speak to each other *The Healing Power of Spirituality [3 volumes]* J. Harold Ellens, 2009-12-30 This three volume set addresses how the role of spirituality and its constructive expressions in various religions and outside of formal religion enhances human personality and experience Theologian and acclaimed scholar J Harold Ellens now offers a breakthrough work on the positive impact of faith In *The Healing Power of Spirituality and Religion* an extraordinary group of scholars discuss the latest scientific research into the connection between belief and psychological and physical well being Each volume of *The Healing Power of Spirituality* focuses on a specific aspect of the scientific exploration of faith and well being volume one examines the healing power of personal spiritualities like I Ching and Transcendentalism volume two looks at the subject in the context of Christianity Judaism and other world faiths and volume three explores the psychodynamics of healing spirituality and religion including the role of biochemical and chemical reactions in heightening psychospiritual apperception 55 distinguished contributors
