China's School Leadership Daming Feng, 2019-11-15 This open access book outlines key terms of China's school leadership in Chinese political and legal, financial, administrative and cultural contexts. It reveals and interprets the real meaning of these practical terms based on existing laws, government documents, school policy texts, as well as the latest empirical findings from school leaders and teachers' surveys and interviews in China. Providing a holistic picture of China's school leadership through the unique meanings of these terms, the book offers researchers and graduate students insights into school leadership practice and its context in China. Thus, it would likely intensify readers' knowledge base to analyse and interpret the phenomenon and research data regarding China's school leadership. [Protestant School Leaders: A Qualitative Research about their Self-understanding](#) Njobati, Frederick Fondzenyuy, The study is concerned with the self-understanding of Protestant secondary school principals about their school leadership in the context of Cameroon where education is rooted in missionary and colonial times. The debate at international level on whether or not non-state schools are widening inequality gaps and whether school leadership is contributing to enlightenment or to fundamentalism matter in researching about the Protestant school profile and leadership. The study therefore seeks to answer the research question: What are the perceptions of secondary school principals of Protestant schools about their school leadership? The research was conceptualized as exploratory and hypothesis generating within the qualitative approach. It used semi-structured interviews to collect data from 26 theoretically sampled secondary school principals. The data was analyzed by qualitative content analysis using the

grounded theory in an iterative deductive inductive way Through the generalization process of abduction and by a deep analysis of the empirical data the criteria which constitute the categories of quality first emerged Thereafter six ideal types of leading understanding were generated and consists of 1 call for superiority leadership 2 state conformational leadership 3 ecclesiastical leadership 4 community participatory leadership 5 vocation to serve leadership and 6 diaconal leadership Further analysis revealed a multi dimensional self understanding by principals on the Protestant ethos of schools and their leadership function Thus not all the six ideal leadership types are contributing to quality education On the one hand there are fundamentalist leaders focusing on normative aspects of discipline while on the other hand there are leaders promoting democratic values or working in a diaconal way promoting social justice Furthermore principals show little awareness of belonging to the church as a global institution
