Understanding Conversion:

The Oxford Handbook of Religious Conversion Lewis R. Rambo, Charles E. Farhadian, 2014-03-06 The Oxford Handbook of Religious Conversion offers a comprehensive exploration of the dynamics of religious conversion which for centuries has profoundly shaped societies cultures and individuals throughout the world Scholars from a wide array of religions and disciplines interpret both the varieties of conversion experiences and the processes that inform this personal and communal phenomenon This volume examines the experiences of individuals and communities who change religions those who experience an intensification of their religion of origin and those who encounter new religions through colonial intrusion missionary work and charismatic and revitalization movements The thirty two innovative essays provide overviews of the history of particular religions including Hinduism Buddhism Confucianism Taoism Sikhism Islam Christianity Judaism indigenous religions and new religious movements The essays also offer a wide range of disciplinary perspectives psychological sociological anthropological legal political feminist and geographical on methods and theories deployed in understanding conversion and insight into various forms of deconversion

"Born Again": A Portrait and Analysis of the Doctrine of Regeneration within Evangelical Protestantism Stephen J. Hamilton, 2017-04-03 Stephen J Hamilton attempts to create a portrait of born again Christianity by providing a general introduction to the doctrine of regeneration including its development in modernity as well as short exegeses of relevant scriptural texts followed by a close reading of four theologians Philipp Jakob Spener Jonathan Edwards Friedrich D E Schleiermacher and Charles G Finney who all associate the doctrine of regeneration with an experience of presence in the individual believer In light of these analyses he then traces a general theological structure of the born again understanding of regeneration including a catalogue of theological issues over which there is significant disagreement in order to create a topography of born again theologies In the final section he applies these results to contemporary conversion narratives of non theologians It is in such conversion narratives the author argues that theologians can discover an implicit lived theology that reveals how doctrines are perceived and put into practice among Christians Accordingly this is to be understood as the result of the creative reciprocity between often tacit theological convictions and the experiences of the Christian life The final chapter as a coda to the entire work offers some concluding reflections on the present cultural and political situation in the USA pertaining to born again Christianity and argues against any oversimplifications of the relationship between born again theologies culture and politics

Preparations for digital switchover Great Britain: National Audit Office, 2008-02-27 In September 2005 the Government after consultation with the broadcasting industry and Ofcom announced a programme to replace analogue television broadcasts with digital television region by region between 2008 and 2012 digital switchover This report considers how this objective is being pursued by the Department for Culture Media and Sport and the Department for Business Enterprise and Regulatory Reform the Departments who have joint responsibility for delivering the policy objective Switchover involves the

conversion of more than a thousand television transmitter sites in order to ensure public service broadcasting is available to some 25 million households in digital instead of analogue form Unless households have at least one television set capable of receiving digital television signals they will lose access to broadcast television after switchover The Departments estimate it will cost the UK economy 4.6 billion mostly borne by consumers through the cost of acquiring and installing digital receiving equipment The Departments estimate the cost will be outweighed by benefits to consumers and business totalling 6.3 billion The programme is progressing well with main set conversion at 85 per cent and a successful switchover in the flagship area of Copeland The complexity of the non contractual delivery and governance arrangements poses inherent risks to the objectives Public awareness of the switchover is high though not in some sections of the population The programme's communications and help scheme activities are funded through ring fenced amounts within the licence fee spent by the BBC and the BBC has started to set performance measures for the 800 million ring fenced for switchover activities Evidence from Copeland suggests that take up of the help scheme might be significantly lower than that anticipated by the Departments in their cost model

"Every Valley Shall Be Exalted" Constance Brittain Bouchard,2017-05-31 In high medieval France men and women saw the world around them as the product of tensions between opposites Imbued with a Christian culture in which a penniless preacher was also the King of Kings and the last were expected to be first twelfth century thinkers brought order to their lives through the creation of opposing categories In a highly original work Constance Brittain Bouchard examines this poorly understood component of twelfth century thought one responsible in her view for the fundamental strangeness of that culture to modern thinking Scholars have long recognized that dialectical reasoning was the basic approach to philosophical legal and theological matters in the high Middle Ages Bouchard argues that this way of thinking and categorizing which she terms a discourse of opposites permeated all aspects of medieval thought She rejects suggestions that it was the result of imprecision and provides evidence that people of that era sought not to reconcile opposing categories but rather to maintain them Bouchard scrutinizes the medieval use of opposites in five broad areas scholasticism romance legal disputes conversion and the construction of gender Drawing on research in a series of previously unedited charters and the earliest glossa manuscripts she demonstrates that this method of constructing reality was a constitutive element of the thought of the period
