Unity and Disunity and Other Mathematical Essays Philip J. Davis, 2015 This book is a mathematical potpourri Its material originated in classroom presentations formal lectures sections of earlier books book reviews or just things written by the author for his own pleasure Written in a nontechnical fashion this book expresses the unique vision and attitude of the author towards the role of mathematics in society It contains observations or incidental remarks on mathematics its nature its impacts on education and science and technology its personalities and philosophies The book is directed towards the math buffs of the world and more generally towards the literate and interested public Philip Davis is known for his work in numerical analysis and approximation theory as well as his investigations in the history and philosophy of mathematics Currently a Professor Emeritus from the Division of Applied Mathematics at Brown University Davis is known for his books both in the areas of computational mathematics and approximation theory and for books exploring certain questions in the philosophy of mathematics and the role of mathematics in society

Mathematisation and Demathematisation, 2007-01-01 In this volume scholars from diverse strands of research have contributed their perspectives on a process of mathematisation which renders social economical or political relationships increasingly formal At the same time mathematical skills lose their importance as they become replaced by diverse technological tools a process of demathematisation takes place The computerization of financial transactions calculation of taxes and fees comparison of prices as well as orientation by means of GPS visualisation of complex data and electronic voting systems all these mathematical technologies increasingly penetrate the lifestyle of consumers What are the perils and promises of this development Who is in charge who is affected who is excluded A common concern of all the authors of this volume is an attempt to draw attention to issues related to the formatting power of mathematics and to its role as implicit knowledge which results in a process of demathematisation This process having once received considerable attention is now threatened to be eclipsed by the proliferation of a discussion of school mathematics which shows a tendency of cutting off its own philosophical and political roots Taken together the contributions reveal a rather complex picture They draw attention to the importance of clarifying epistemological societal and ideological issues as a prerequisite for a discussion of curriculum

Elysium Bryan Barton, 2024-12-20 Elysium City of Promise begins with a brilliant young man named Anthony Collins who graduates with two doctorates in Physics and Electrical Engineering He is frustrated by academia because the university is not prepared to fund

his expensive projects He believes he has stumbled on to new and exciting technological advances that could be turned into the most powerful weapons the world has ever known The military wants him to come work for them but he has turned them down several times Then the CIA posing as venture capitalists offer him a job with the intent to get his technology from him and dispose of the naive Dr Collins When he finds out he s been tricked he runs away and takes his technology with him builds a underground lab and that is the beginning of the city Elysium Over the years other scientists join him to help create a beautiful underground city The government is still looking for Anthony and sends a beautiful reporter to try to flush him out Anthony introduces her to his wonderful city and a relationship develops Just as these two are getting to know each other the city experiences a terrible earthquake Their sensors and computers systems tell them that it was caused by an underground nuclear explosion They investigate and find that rogue members of the DoD and CIA planted a nuclear device near the last known location of Dr Collins to try to either kill him or force him to surface The residents of Elysium retaliate by destroying the NSA building in Washington where the decision was made to use the bomb Anthony then calls the US President on his personal cell phone and tells him what has happened and provides the President with a file of proof of the rogue members involvement Anthony tells him that if this rogue group is not charged for their crimes and the incident made public the US will lose the White house the Pentagon and the congressional house all in one day The President promises to get to the bottom of this issue and reviews the evidence Anthony sent him The President and Anthony become friends Maria agrees to marry Anthony they have a wonderful wedding and go on a fantastic honeymoon When they return Elysium s city manager asks Maria if she will be their first anchor for the nightly news She accepts and begins providing the nightly news for all Elysians to help create a connection between the underground city and surface events around the world

Mathematics & Common Sense Philip J. Davis,2006-11-30 From the Preface This book is addressed to all who are curious about the nature of mathematics and its role in society It is neither a text book nor a specialists book It consists of a number of loosely linked essays that may be read independently and for which I have tried to provide a leitmotif by throwing light on the relationship between mathematics and common sense In these essays I hope to foster a critical attitude towards both the existence of common sense in mathematics and the ambiguous role that it can play *The Learning Connection* ,1982
