

Do you have persistent pain?

HAVE YOU HAD PAIN THAT...

- Lasts beyond normal healing?
- Feels like it spreads, moves around, gets bigger?
- Increases with stress or decreases when you are having fun?
- Affects your ability to sleep?

DO YOU FIND THAT...

- Tests don't explain your symptoms?
- Medication doesn't completely control your pain?
- People don't think your pain is real

Some things make pain worse

For many years, we misunderstood pain. We now understand that pain is actually produced in the brain using information from your body.

With persistent pain, your brain forms more and more pathways over time that can create pain.

We say that nerves that fire together, wire together.

Some things make pain better

We now know that the brain can change.

We can rewire these pathways and change our pain.

David S Butler,G Lorimer Moseley,2013-07 Imagine an orchestra in your brain It plays all kinds of harmonious melodies then pain comes along and the different sections of the orchestra are reduced to a few pain tunes All pain is real And for many people it is a debilitating part of everyday life It is now known that understanding more about why things hurt can actually help people to overcome their pain Recent advances in fields such as neurophysiology brain imaging immunology psychology and cellular biology have provided an explanatory platform from which to explore pain In everyday language accompanied by

quirky illustrations Explain Pain discusses how pain responses are produced by the brain how responses to injury from the autonomic motor and immune systems in your body contribute to pain and why pain can persist after tissues have had plenty of time to heal Explain Pain aims to give clinicians and people in pain the power to challenge pain and to consider new models for viewing what happens during pain Once they have learnt about the processes involved they can follow a scientific route to recovery The Authors Dr Lorimer Moseley is Professor of Clinical Neurosciences and the Inaugural Chair in Physiotherapy at the University of South Australia Adelaide where he leads research groups at Body in Mind as well as with Neuroscience Research Australia in Sydney Dr David Butler is an international freelance educator author and director of the Neuro Orthopaedic Institute based in Adelaide Australia Both authors continue to publish and present widely

Understanding Pain Naheed Ali, Moshe Lewis, 2015-04-01 Pain is informally defined as the body's way of uncovering a problem Whether due to an injury infection or something else pain alerts a person that something is not right Sometimes pain goes along with inflammation and swelling and when it does the problem is more evident Oftentimes pain is more generalized to the entire body signaling a viral infection such as a flu virus Still other times there is no apparent root cause for a person's pain Yet millions of people suffer from some form of pain on a daily basis Understanding Pain walks readers through the various types of pain the causes and symptoms as well as the methods of treatment currently available From prescription medication to acupuncture and massage therapy various approaches may work for some but not for others But handling pain is essential for living well and functioning on a daily basis Here the authors provide a comprehensive introduction to the subject covering self care as well as caring for others in pain and addressing alternative as well as traditional methods of pain management

Understanding Pain Fernando Cervero, 2014-02-14 An expert explores the nature of pain why it hurts and why some pain is good and some pain is bad If you touch something hot it hurts You snatch your hand away from the hot thing immediately Obviously But what is really happening biologically and emotionally In Understanding Pain Fernando Cervero explores the mechanisms and the meaning of pain You touch something hot and your brain triggers a reflex action that causes you to withdraw your hand protecting you from injury That kind of pain Cervero explains is actually good for us it acts as an alarm that warns us of danger and keeps us away from harm But Cervero tells us not all pain is good for you There is another kind of pain that is more like a curse chronic pain that is not related to injury This is the kind of pain that fills pain clinics and makes life miserable Cervero describes current research into the mysteries of chronic pain and efforts to develop more effective treatments Cervero reminds us that pain is the most common reason for people to seek medical attention but that it remains a biological enigma It is protective but not always Its effects are not only sensory but also emotional There is no way to measure it objectively no test that comes back positive for pain the only way a medical professional can gauge pain is by listening to the patient's description of it The idea of pain as a test of character or a punishment to be borne is changing prevention and treatment of pain are increasingly important to researchers clinicians

and patients Cervero's account brings us closer to understanding the meaning of pain *Explain Pain 2nd Edn.* David Sheridan Butler, G. Lorimer Moseley, 2013 Solid evidence now shows that knowing why we hurt will help us heal All pain is real and for many people it is a debilitating part of everyday life In a world where 1 in 5 of us experience ongoing pain and where there is increasing evidence for the failure of synthetic drugs take heart help is at hand It is now known that understanding more about why things hurt can actually help treat pain Recent advances in fields such as neurophysiology brain imaging immunology psychology and cellular biology have provided an explanatory platform from which to explore pain In everyday language accompanied by quirky illustrations *Explain Pain Second Edition* discusses how pain responses are produced by the brain how responses to injury from the autonomic motor and immune systems in your body contribute to pain and why pain can persist after tissues have had plenty of time to heal Co author Dr David Butler founder of the Neuro Orthopaedic Institute says that it is no longer acceptable that pain be just managed we must expect that it can be treated and sufferers can alter it themselves through education *Explain Pain* has sold around 60 000 copies world wide in 5 languages and continues to inspire clinical research and multidisciplinary pain treatment globally *Explain Pain* aims to give people in pain the power to challenge pain and to consider new models for viewing what happens to your body and brain during pain Once they have learnt about the processes involved they can follow a scientific route to recovery Why a second edition A decade of scientific research is a lot and we need to keep on top of it In the last 10 years there has been increasing support for therapeutic neuroscience education from clinical trials educational science neuroscience plain logic and the failure of drug therapy on chronic pain outcomes Lorimer and David have subtly changed some of the language so that the second edition can be delivered with much more authority than the first Noigroup Publications 2013 133 pages 90 illustrations and diagrams half Canadian wire bound ISBN 978 0 9873426 6 9 Authors Dr David S Butler and Prof G Lorimer Moseley
