Humanity has always moved forward by creating tools. But for the first time, it has created something capable of thinking, learning, and deciding. In *The Last Invention*, readers are taken on a deep, clear, and forward-looking exploration of the rise of advanced artificial intelligence and its irreversible consequences for civilization. The book examines how AI has evolved from a simple technological tool into a global cognitive infrastructure transforming education, labor, economics, governments, art, science, and even the human mind itself. With accessible language and strong technical rigor, the work explores the historical evolution of

artificial intelligence how neural networks and large language models truly function the rise of multimodal generative AI the direct impact of AI on the global economy professions and geopolitical power and the ethical social and human limits of this transformation Moving beyond both technological hype and dystopian fear the book presents a central argument the greatest risk of AI is not the machine itself but how humanity chooses to use it By addressing themes such as expanded cognition digital exclusion inclusive interfaces augmented humans and mental sovereignty the book reveals that AI can become either the greatest instrument of inclusion ever created or the most sophisticated mechanism of inequality in human history The Last Invention is **Expert Systems and Advanced Data Processing** M.
