The Archaeology of New Netherland Craig Lukezic, John P. McCarthy, 2025-03-18 Uncovering the material culture of Dutch colonization in North America. The Archaeology of New Netherland illuminates the influence of the Dutch empire in North America, assembling evidence from seventeenth-century settlements located in present-day New York, New Jersey, Connecticut, Pennsylvania, and Delaware. Archaeological data from this important early colony has often been overlooked because it lies underneath major urban and industrial regions, and this collection makes a wealth of information widely available for the first time. Contributors to this volume begin by discussing the global context of Dutch colonization and reviewing typical Dutch material culture of the time as seen in ceramics from Amsterdam households. Next, they focus on communities and activities at colonial sites such as forts, trading stations, drinking houses, and farms. The essays examine the agency and impact of Indigenous people and enslaved Africans, particularly women in the society of New Netherland, and they trace interactions between Dutch settlers and Europeans from other colonies, including New Sweden. The volume also features landmark studies of cooking pots, marbles, tobacco pipes, and other artifacts. The research in this volume offers an invitation to investigate New Netherland with the same sustained rigor that archaeologists and historians have shown for English colonialism. The many topics outlined here will serve as starting points for further work on early Dutch expansion in America.

Zooarchaeology Elizabeth J. Reitz, Elizabeth S. Wing, 1999-02-04 Zooarchaeology is a detailed reference manual for students and professional archaeologists interested in identifying and analyzing animal remains from archaeological sites. Drawing on material from all over the world and covering a time span from the Pleistocene to the nineteenth century AD, the emphasis is on animals whose remains inform us about many aspects of the relationships between humans and their natural and social environments, especially site formation processes, subsistence strategies, and paleoenvironments. The authors discuss suitable methods and theories for all vertebrate classes and molluscs and include hypothetical examples to demonstrate these. There are extensive references and illustrations to help in the process of identification.

the Kings Bay Locality: Zooarchaeology William Hampton Adams,1985 **Archaeological Report** ,1900 **The Art and Archaeology of Florida's Wetlands** Barbara A. Purdy,1991-06-18 Waterlogged archaeological sites in Florida contain tools art objects dietary items human skeletal remains and glimpses of past environments that do not survive the ravages of time at typical terrestrial sites Unfortunately archaeological wet sites are invisible since their preservation depends upon their entombment in oxygen free organic deposits As a result they are often destroyed accidentally during draining dredging and development projects These sites and the objects they contain are an important part of Florida s heritage They provide an opportunity to learn how the state s earliest residents used available resources to make their lives more comfortable and how they expressed themselves artistically Without the wood carvings from water saturated sites it would be easy to think of early Floridians as culturally impoverished because Florida does not have stone suitable for creating sculptures This book compiles in one volume detailed accounts of such famous sites as Key Marco Little Salt Spring Windover Ft Center and others The book discusses wet site environments and explains the kinds of physical chemical and structural components required to ensure that the proper conditions for site formation are present and prevail through time The book also talks about how to preserve artifacts that have been entombed in anaerobic deposits and the importance of classes of objects such as wooden carvings dietary items human skeletal remains to our better understanding of past cultures Until now this information has been scattered in obscure documents and articles thus diminishing its importance Our ancestors may not have been Indians but they contributed to the state s heritage for more than 10 000 years Once disturbed by ambitious dredging and draining projects their story is gone forever it cannot be transplanted to another location *Publications of the Ohio Archaeological and Historical Society* ,1910 **The Archaeologist** ,1895 **The Archaeological Bulletin** Allen Jesse Reynolds,1913 *Annual Archaeological Report* ,1898 *Archaeological Contexts and Assemblages at Martin Farm* Gerald F.
