The Storytime Handbook

Nina Schatzkamer Miller, 2014-01-23 Fresh fun ideas for children's storytime fill this book. The author, a long-time storytime facilitator, has put together 52 weekly themes plus additional plans for holidays, all with detailed instructions for talking about the theme and choosing the books, crafts, songs, poems, games, and snacks. Each storytime idea is illustrated with photographs of a suggested craft and snack for easy reference. Libraries, bookstores, preschools, and parents alike can use this book to offer themed storytimes that include discussion, literature, art, music, movement, and food. Options are provided for each storytime so the ideas can be used year after year.

Language-Sensitive Teaching and Learning Richard Rossner, Rod Bolitho, 2023-01-01 This textbook aims to raise teachers' language awareness to emphasise the importance of language and communication in enabling young people to reach their potential and to develop their knowledge of how language and communication function in educational environments as well as outside. Laid out in a clear five-unit structure and complemented by a range of classroom activities, reflective exercises, and case study examples from around the world, this book addresses the need for teachers to become more linguistically aware and sensitive in an accessible and reader-friendly way. It is an essential resource for pre-service and in-service teachers working with a range of age groups across the curriculum.

Language and the Joint Creation of Knowledge

Neil Mercer, 2019-04-25 In the World Library of Educationalists series, international experts themselves compile career-long collections of what they judge to be their finest pieces: extracts from books, key articles, salient research findings, major theoretical and practical contributions, so the world can read them in a single, manageable volume. Readers will be able to follow the themes and strands and see how their work contributes to the development of the field. *Language and the Joint Creation of Knowledge* draws on the most prominent writing of Neil Mercer, covering his ground-breaking and critically acclaimed work on the role of talk in education and on the relationship between spoken language and cognition. The text explores key themes relating theoretical ideas to research evidence and to practical educational situations that improve children's lives. Offering students and researchers a clear, accessible, and up-to-date account of a sociocultural perspective on the relationship between spoken language and cognition, it explains one of the key themes in Neil Mercer's work: that humans have uniquely evolved the capacity to think together or interthink. Offering a crucial insight into the work of Neil Mercer, this selection showcases why his approach has become the dominant paradigm in educational research and why it is increasingly influential in the psychology of teaching and learning. This unique collection of published articles and chapters, which

represent the key themes and range of his research over the last 40 years will be of interest to all followers of his work and any reader interested in the role of language in education

Teaching Science Through Trade Books Christine Anne Royce, Karen Rohrich Ansberry, Emily Rachel Morgan, 2012 If you like the popular Teaching Science Through Trade Books columns in NSTA's journal *Science and Children* or if you've become enamored of the award-winning Picture Perfect Science Lessons series you'll love this new collection. It's based on the same time-saving concept: By using children's books to pique students' interest, you can combine science teaching with reading instruction in an engaging and effective way.

Dialogue and the Development of Children's Thinking Neil Mercer, Karen Littleton, 2007-06-22 This book draws on extensive research to provide a ground-breaking new account of the relationship between dialogue and children's learning development. It closely relates the research findings to real-life classrooms so that it is of practical value to teachers and students concerned that their children are offered the best possible learning opportunities. The authors provide a clear, accessible, and well-illustrated case for the importance of dialogue in children's intellectual development and support this with a new and more educationally relevant version of socio-cultural theory which explains the fascinating relationship between dialogues and learning. In educational terms, a sociocultural theory that relates social, cultural, and historical processes, interpersonal communication, and applied linguistics is an ideal way of explaining how school experience helps children learn and develop. By using evidence of how the collective construction of knowledge is achieved and how engagement in dialogues shapes children's educational progress and intellectual development, the authors provide a text which is essential for educational researchers, postgraduate students of education, and teachers, and is also of interest to many psychologists and applied linguists.

Everyday Earth and Space Science Mysteries Richard Konicek-Moran, 2013 What are the odds that a meteor will hit your house? Do you actually get more sunlight from Daylight Savings Time? Where do puddles go? By presenting everyday mysteries like these, this book will motivate your students to carry out hands-on science investigations and actually care about the results. These 19 open-ended mysteries focus exclusively on Earth and space science, including astronomy, energy, climate, and geology. The stories come with lists of science concepts to explore, grade-appropriate strategies for using them, and explanations of how the lessons align with national standards. They also relieve you of the tiring work of designing inquiry lessons from scratch.
