Steps In Commutative Algebra:

Steps in Commutative Algebra R. Y. Sharp,2000 This introductory account of commutative algebra is aimed at advanced undergraduates and first year graduate students Assuming only basic abstract algebra it provides a good foundation in commutative ring theory from which the reader can proceed to more advanced works in commutative algebra and algebraic geometry The style throughout is rigorous but concrete with exercises and examples given within chapters and hints provided for the more challenging problems used in the subsequent development After reminders about basic material on commutative rings ideals and modules are extensively discussed with applications including to canonical forms for square matrices The core of the book discusses the fundamental theory of commutative Noetherian rings Affine algebras over fields dimension theory and regular local rings are also treated and for this second edition two further chapters on regular sequences and Cohen Macaulay rings have been added This book is ideal as a route into commutative algebra **Steps in Commutative Algebra** ,2000 Introductory account of commutative algebra aimed at students with a background in basic algebra **On the Structure of Algebras with a Commutative Algebra as Operator Domain** George William Whaples,1939 Computational Commutative Algebra and Combinatorics Takayuki Hibi,2002 This volume constitutes the proceedings of the International Conference on Computational Commutative Algebra and Combinatorics held in Osaka Japan It contains excellent survey articles and research papers on various topics related to the theme of the conference Of particular interest are two survey articles Algebraic Shifting by Gil Kalai and Generic Initial Ideals and Graded Betti Numbers by Jurgen Herzog The volume is suitable for graduate students and researchmathematicians interested in discrete mathematics Information for our distributors Published for the Mathematical Society of Japan by Kinokuniya Tokyo and distributed worldwide except in Japan by the AMS All commercial channel discounts apply **Interactions between Homotopy Theory and Algebra** Luchezar L. Avramov,2007 This book is based on talks presented at the Summer School on Interactions between Homotopy theory and Algebra held at the University of Chicago in the summer of 2004 The goal of this book is to create a resource for background and for current directions of research related to deep connections between homotopy theory and algebra including algebraic geometry commutative algebra and representation theory The articles in this book are aimed at the audience of beginning researchers with varied mathematical backgrounds and have been written with both the quality of exposition and the accessibility to novices in mind **Introduction to the Logic of Algebra** Ellery Williams Davis,1890 Mathematical Reviews ,2006 Computational Methods in Commutative Algebra and Algebraic Geometry Wolmer V. Vasconcelos,David Eisenbud,1998 This ACM volume in computational algebra deals with methods and techniques to tackle problems that can be represented by data structures which are essentially matrices with polynomial entries mediated by the disciplines of commutative algebra and algebraic geometry It relates discoveries by a growing interdisciplinary group of researchers in the past decade It highlights the use of advanced techniques to bring down the cost

of computation The book includes concrete algorithms written in MACAULAY It is intended for advanced students and researchers with interests both in algebra and computation Many parts of it can be read by anyone with a basic abstract algebra course **Algebraic Geometry for Beginners** C. Musili,2001-03-15 **The Cumulative Book Index** ,1990 A world list of books in the English language **Hokkaido Mathematical Journal** ,2017 **An Elementary Treatise on the Calculus** George Alexander Gibson,1901 *Complex Methods for Partial Differential Equations* Heinrich Begehr,A. Okay Celebi,W. Tutschke,1999-11-30 The book contains review chapters as well as state of the art research chapters on topics ranging from complex elliptic first order systems and second order systems with regular or singular coefficients to overdetermined systems in several complex variables and partial differential equations in Clifford analysis Different boundary value problems are studied Applications to crack problems in elasticity theory to cusped bars plates and shells are given Wavelet transformations are constructed in Banach spaces and used to identify complex analysis from the viewpoint of geometry Fixed point problems even in abstract Banach spaces are investigated with respect to an optimal domain of existence for the solution Audience Researchers working in the field as well as scientists interested in the applications *Computational Aspects of Commutative Algebra* Lorenzo Robbiano,1989 *Quaestiones Mathematicae* ,1998 **Forthcoming Books** Rose Arny,2001 **Algebraic Operads** Murray R. Bremner,Vladimir Dotsenko,2016-04-06 This book presents a systematic treatment of Grobner bases in several contexts The book builds up to the theory of Grobner bases for operads due to the second author and Khoroshkin as well as various applications of the corresponding diamond lemmas in algebra Throughout the book both the mathematical theory and computational methods are emphasized and numerous algorithms examples and exercises are provided to clarify and illustrate the concrete meaning of abstract theory **Honam Mathematical Journal** ,2001 *Commutative Algebra, Algebraic Geometry, and Computational Methods* David Eisenbud,1999-07 This volume contains papers presented at the International Conference on Commutative Algebra Algebraic geometry and Computational methods held in Hanoi in 1996 as well as papers written subsequently It features both expository articles as well as research papers on a range of currently active areas in commutative algebra algebraic geometry particularly surveys on intersection theory and combinatorics In addition a special feature is a section on the life and work of Wolfgang Vogel who was an organiser of the conference **A Treatise on Universal Algebra** Alfred North Whitehead,1898
