**A Wasp Among Eagles** Ann Carl,2010-06-22 Before World War II most Americans did not believe that the average woman could fly professionally but during the war more than a thousand women pilots proved them wrong These were the Women Airforce Service Pilots WASPs who served as military flyers on the home front In March 1944 one of them Ann Baumgartner was assigned to the Fighter Flight Test Branch at Wright Field in Dayton Ohio There she would make history as the only woman to test fly experimental planes during the war and the first woman to fly a jet A WASP among Eagles is the first person story of how Baumgartner learned to fly trained as a WASP and became one of the earliest jet age pioneers Flying such planes as the Curtiss A 25 Helldiver the Lockheed P 38 and the B 29 Superfortress she was the first woman to participate in a host of experiments including in air refueling and flying the first fighter equipped with a pressurized cockpit But in evaluating the long awaited turbojet powered Bell YP 59A she set a first record that would remain unchallenged for ten years

**Speed** Gilliland|Keith Dunnivant Bob Gilliland (Dunnivant),Keith Dunnivant,2021-06 On December 22 1964 at a small closely guarded airstrip in the desert town of Palmdale California Lockheed test pilot Bob Gilliland stepped into a strange looking aircraft and roared into aviation history Developed at the super secret Skunk Works the SR 71 Blackbird was a technological marvel In fact more than a half century later the Mach 3 plus titanium wonder designed by Clarence L Kelly Johnson remains the world s fastest jet It took a test pilot with the right combination of intelligence skill and nerve to make the first flight of the SR 71 and the thirty eight year old Gilliland had spent much of his life pushing the edge In Speed one of America s greatest test pilots collaborates with acclaimed journalist Keith Dunnivant to tell his remarkable story How he was pushed to excel by his demanding father How a lucky envelope at the U S Naval Academy altered the trajectory of his life How he talked his way into U S Air Force fighters at the dawn of the jet age despite being told he was too tall How he made the conscious decision to trade the security of the business world for the dangerous life of an experimental test pilot including time at the clandestine base Area 51 working on the Central Intelligence Agency s Oxcart program The narrative focuses most intently on Gilliland s years as the chief test pilot of the SR 71 as he played a leading role in the development of the entire fleet of spy planes while surviving several emergencies that very nearly ended in disaster Waging the Cold War at 85 000 feet the SR 71 became an unrivaled intelligence gathering asset for the U S Air Force invulnerable to enemy defenses for a quarter century Gilliland s work with the SR 71 defined him especially after the Cold War when many of the secrets began to be revealed and the plane emerged from the shadows not just as a tangible museum artifact but as an icon that burrowed deep into the national consciousness Like the Blackbird itself Speed is a story animated by the power of ambition and risk taking during the heady days of the American Century

Testing Death George J. Marrett,2006-05-30 In 1969 after his return from Vietnam George Marrett took a job as a test pilot at Hughes Aircraft For

twenty years he tested the most sophisticated airborne radar and missiles ever designed for advanced Navy and Air Force aircraft Marrett's masterful command of storytelling puts the reader in the cockpit during the F 15 F 16 and F 18 weapons systems flyoff as well as during the firing of a Mach 3 Phoenix missile from an F 14A Tomcat at a Soviet MiG Foxbat target In addition to the weaponry Marrett relives stories of espionage deadly crashes and the development of the B 2 Spirit stealth bomber radar He combines the thrill of test flying with the pathos humor and tragedy that is the everyday life of a test pilot showing how the Cold War was actually won in the skies above Southern California The background to Marrett's tale is the story of Hughes Aircraft While Howard Hughes's huge and unwieldy Spruce Goose never made it into World War II the Radio Department he started grew to become the electronics giant Hughes Aircraft Company By the 1950s Hughes Aircraft built airborne radar and missiles for all of the Air Force interceptors stationed on the East and West Coasts and along the border with Canada to defend the United States from Soviet bombers In the years that followed the company built airborne radar for the Navy F 14A Tomcat the Air Force F 15A Eagle the Navy F 18A Hornet and the B 2 stealth bomber They also built the Navy air to air AIM 54 Phoenix and the Air Force air to ground AGM 65 Maverick missiles These advanced electronic weapons were developed and fielded during President Reagan's massive buildup of military might Even though Hughes himself did not live to see the Berlin Wall fall in 1989 the company he built made an essential contribution to the collapse of communism

**Cold War Test Pilot** Ron Burrows, 2022-01-30 A chief test pilot recounts his hair raising experiences with the RAF in this detailed and often witty memoir Includes photos The Falkland Islands had been invaded and a Task Force was already steaming south at full speed On board the carriers were the Harriers that would provide essential aerial cover for the British troops and ships sent to recapture the islands They would be entering particularly hostile territory and

the type's capabilities urgently needed to be expanded and proved. This was a job that Ron Burrows and the test pilots of his elite Fighter Test Squadron at Boscombe Down were ready to take on. From the 1960s to the 1990s Ron test flew all the RAF's fast jets in the process of which he survived two crash landings and two emergency ejections as well as numerous other close shaves. A master of his craft he rose to become the Aeroplane and Armament Experimental Establishment's chief test pilot and this is his remarkable story. With four test flying tours under his belt and close air support missions flying Hunters in the Aden Emergency Ron's experiences extended throughout the critical final decades of the Cold War. A graduate of the US Navy's test pilot school he has flown an unusually broad range of US and UK aircraft from fast jets to heavy multi engine aircraft. With his unrivaled knowledge and expertise he is able to explain the methods, techniques and demands of his profession with many examples of what can and often does go wrong in aircraft development and testing. His descriptions of his near misses and catastrophic accidents are written with color and candor. But he also tries to inform the reader about the skills required to fly and test fast jets and about the development of cockpit displays and design highlighting some of the issues and problems encountered in development and in operation. If it can go wrong it will go wrong could be the subtitle of this frank and witty account which flies along with the speed of one of those fast jets.

**Testing Tornado** J. David Eagles  
AFC, 2016-09-08

It was early Cold War days when 17 year old David Eagles applied to the Fleet Air Arm hoping to be a fighter pilot for his national service. He little imagined the career that would follow. After flying training with the US Navy and Australian Fleet Air Arm he settled into Fleet Air Arm fighter pilot life. He progressed through Naval Test Pilot duties where he was forced to eject from a Buccaneer during catapult launch trials before joining British Aerospace and playing a major part in the cockpit design and flight testing of the RAF's first fly by wire and swing wing aircraft the Panavia Tornado. His other experiences include ditching a Firefly into the sea and the near loss of the first British Tornado prototype after a bird strike. Finally after 6 000 flying hours in sixty different types of aircraft Eagles finished his career by making the first flight of the EAP the technology demonstrator for the new Eurofighter Typhoon. Vividly illustrated with photographs, documents and plans this is a fascinating memoir of naval flying and test flying some of the world's most iconic fighters.

**Test Pilot** Brian Johnson, 2011-06-20

Test pilots: dashing and courageous young men or foolhardy gamblers. In this fully illustrated book written by the producer of the BBC1 television series of the same name we follow the ups and downs of a group of trainee test pilots at Boscombe Down in Wiltshire. Beginning with the exacting selection procedure we discover what personal and professional qualities a pilot needs in order to become a test pilot. Only six UK and twelve foreign students are chosen each year and once selected the pressure on them steadily mounts. As the students learn to push each aircraft's performance to its limits they too are being mentally and physically stretched further than ever before. Training is given on both fixed and rotary wing aircraft and by the end of the course each student is fully conversant with the different techniques necessary to fly each type. They learn how to recover safely from spins, how to cope with sudden failures of equipment in mid flight and how to land

an aircraft with no power All the time they are assessing each aircraft s capabilities and the scope of the on board technology The final part of the course is the preview exercise when every student is required to evaluate an aircraft he has never flown before and to make a formal presentation to his tutors and examiners Using a number of remarkably frank interviews with students and tutors Brian Johnson explores the process of becoming a test pilot and reveals both the stresses and successes of the year The RAF has given its full support to both the book and the television programmes and thus has enabled Brian Johnson to produce a unique and authoritative account of the training for one of the most responsible and exciting jobs in modern aviation

**Always Another Dawn** Clay Blair,Albert Scott Crossfield,2018-09-06 a remarkable record The Sunday Times What is it like to fly twice the speed of sound What does it feel like to be hurtling towards the earth from fifteen miles above the ground Albert Scott Crossfield s extraordinary

autobiography of his time as a test pilot highlights the fascinating developments that were being made in aviation just after the Second World War. After a period as a fighter pilot in World War Two and then some time at university studying aeronautical engineering, Crossfield joined NASA's predecessor the National Advisory Committee for Aeronautics. He quickly showed his talents as a research pilot and before long was training in a variety of aircraft including the X-1, X-4, X-5, XF-92, D-558 I and D-558 II. Yet Crossfield's greatest flight came on November 20, 1953, when he was towed to a height of 72,000 feet by a Boeing P2B Superfortress, before diving 62,000 feet and reaching a speed of 1,320 miles per hour. This meant that he was the first person in history to travel at more than twice the speed of sound. A number of years later, Crossfield became both a test pilot and design consultant for the X-15 rocket-powered plane. *Always Another Dawn* provides brilliant insight into the development of this plane and Crossfield's impact upon it, which would eventually travel at six times the speed of sound. Scott Crossfield was a pioneer and a legend in the world of test flight and space flight, said Mike Coats Johnson, Space Center Director. This book is essential reading for anyone interested in the development of aviation after the Second World War, as well as the how men like Crossfield risked their lives in the early years of the space race in order to further our attempts to reach the stars.

Albert Scott Crossfield was an American naval officer and test pilot. He was instrumental in the development of aeronautics and space flight through the 1950s. He co-authored *Always Another Dawn*, a story of a rocket test pilot with Clay Blair Jr, which was published in 1960. He died in a plane crash in 2006. Clay Blair Jr had passed away in 1998. **Higher and Faster** Robert M. White, Jack L. Summers, 2014-01-10. In 1961, pilot Robert M. White flew a hypersonic rocket-powered airplane six times faster than the speed of sound and higher than 300,000 feet above the Earth's surface. This is his story. Tracing his childhood on the rough streets of Manhattan during the Depression, his years as a pilot and POW during World War II, his service in Korea and Vietnam, and his rise as an experimental test pilot in the Air Force, this autobiography is a testament to the role of persistence and excellence in the life of a man whose aeronautical feats are now legend. It is the portrait of an extraordinary man in pursuit of the American dream and a glimpse into a remarkable time in America's aviation history. Luftwaffe Test Pilot Hans-Werner Lerche, 1981-01-01. **Contrails over the Mojave** George Marrett, 2014-07-15. In *Contrails over the Mojave*, George Marrett takes off where Tom Wolfe's *The Right Stuff* ended in 1963. Marrett started the Air Force Test Pilot School at Edwards AFB only two weeks after the school's commander, Col. Chuck Yeager, ejected from a Lockheed NF-104 trying to set a world altitude record. He describes life as a space cadet, experiencing 15 Gs in a human centrifuge, zero G maneuvers in a KC-135 Vomit Comet, and a flight to 80,000 feet in the F-104A Starfighter. After graduating from Yeager's Charm School, he was assigned to the Fighter Branch of Flight Test Operations, where he flew the latest fighter aircraft and chased other test aircraft as they set world speed and altitude records. Marrett takes readers into the cockpit as he goes vertical in a T-38 Talon, completes high G maneuvers in an F-4C Phantom, and conducts wet runway landing tests in the accident-prone F-111A Aardvark. He writes about Col. Silver Fox Stephens setting a world speed record in the YF-12.

Blackbird and Bob Gilliland testing speed stalls in the SR 71 spy plane but he also relives stories of crashes that killed test pilot friends He recounts dead sticking a T 38 to a landing on Rogers Dry Lake after a twin engine failure and conducting dangerous tail hook barrier testing in a fighter jet without a canopy A mysterious UFO sighting in the night sky above the Mojave Desert known as The Edwards Encounter also receives Marrett s attention Whether the author is assessing a new aircraft s performance or describing the experiences of test pilots as they routinely faced the possibility of death this look at the golden age of flight testing both thrills and informs
