Star Identification Guangjun Zhang, 2016-12-23 This book summarizes the research advances in star identification that the author's team has made over the past 10 years systematically introducing the principles of star identification general methods key techniques and practicable algorithms It also offers examples of hardware implementation and performance evaluation for the star identification algorithms Star identification is the key step for celestial navigation and greatly improves the performance of star sensors and as such the book includes the fundamentals of star sensors and celestial navigation the processing of the star catalog and star images star identification using modified triangle algorithms star identification using star patterns and using neural networks rapid star tracking using star matching between adjacent frames as well as implementation hardware and using performance tests for star identification It is not only valuable as a reference book for star sensor designers and researchers working in pattern recognition and other related research fields but also as a teaching resource for senior postgraduate and graduate students majoring in information processing computer science artificial intelligence aeronautics and astronautics automation and instrumentation Dr Guangjun Zhang is a professor at the School of Instrumentation Science and Opto electronics Engineering Beihang University China and also the Vice President of Beihang University China

New Energy Power Generation Automation and Intelligent Technology Pengfei Gu, Yang Xu, Weihua Chen, Zhongqiu Wang, Yongbin Sun, Zheming Liu, 2024-09-04 This book is the 1st volume of proceedings of the 1st Smart Nuclear Power Technology Forum and the 8th China Nuclear Power Plant Digital Technology and Application Seminar held in Shenzhen China in June 2024 This seminar aims to explore the software and hardware of digital and instrument control I C systems in nuclear power plants such as inspection testing certification and research of sensors actuators and control systems and the application of electrical and intelligent operation and maintenance technologies It aims to provide a platform for experts scholars and nuclear power practitioners to exchange technology and share experience At the same time it also provides a platform for the combination of universities and enterprises in the aspects of production education and research and promotes the safe development of nuclear power plants In addition readers will encounter new ideas to achieve more efficient and safer instruments and control systems

Mathematical and Physical Fundamentals of Navigation and Positioning with Earth's Natural Fields Lei Yan, An Li, Wanfeng Ji, Yang Li, 2024-10-02 This book covers various fields relevant to navigation including Earth's magnetic field gravity field topography celestial polarization field electrostatic field and relativistic celestial field effects It introduces the principles and applications of navigation positioning using various natural field navigation and terrain assisted methods including gravity field navigation positioning geomagnetic field navigation positioning terrain assisted navigation

positioning polarization field navigation positioning electrostatic field navigation positioning and relativistic effect verification This book comprehensively introduces the algorithm principles and engineering implementation approaches providing basic theoretical support for precision navigation positioning and deep space exploration Based on the principles of gravity geomagnetic and terrain assisted navigation positioning corresponding to the universal gravitational force and Earth's rotation in Newtonian mechanics it combines polarization field navigation positioning with the energy field effect of solar incident light waves as well as electrostatic field navigation positioning with relativistic effect verification This forms a relatively complete theoretical technical system and abstracts the mathematical essence of each link in the geomagnetic gravity and terrain navigation positioning systems Taking mechanism exploration and algorithm implementation as the basic approach it has confirmed the theoretical correctness and practical feasibility of natural field navigation positioning through verification with actual measurement data This book is mainly targeted at professionals researchers students and readers interested in deep space deep Earth deep sea and polar exploration as well as those working in the field of navigation positioning It is of reference value in deep space deep Earth and deep sea exploration
