Trends In Software Engineering:

, *Emerging Trends for Securing Cyber Physical Systems and the Internet of Things* Bharat Bhushan, Sudhir Kumar Sharma, Parma Nand, Achyut Shankar, Ahmed J. Obaid, 2024-05-09 In the past decades cyber physical systems CPSs have been widely applied to fields such as smart grids environment monitoring aerospace smart transportation and industrial automation Great strides have been made in CPSs to improve the computing mechanism communication and quality of service by applying optimization algorithms Currently these efforts are integrated with the applications of machine learning ML and artificial intelligence AI To maintain system reliability and stability CPSs such as smart grids face numerous challenges including large scale Internet of Things IoT device adaptation ever increasing demands of electrical energy and the rise of a wide range of security threats These challenges bring forth the need to find sustainable and advanced solutions to guarantee reliable and secure operations in these systems The goal of this book is to foster transformative multidisciplinary and novel approaches that ensure CPS security by taking into consideration the unique security challenges present in the environment This book attracts contributions in all aspects pertaining to this multidisciplinary paradigm which includes the development and implementation of Smart CPS Supervisory Control and Data Acquisition SCADA systems CPS for Industry 4.0 CPS architecture for IoT applications and CPS forensics This book Discusses concepts including wireless sensor networks WSNs CPSs and the IoT in a comprehensive manner Covers routing protocols in sensor networks attacks and vulnerabilities in WSNs the Internet of Cyber Physical Things and CPSs for industrial applications Highlights technological advances practical solutions emerging trends and prototypes related to privacy in CPSs and the IoT Presents a pathway and architecture for proactive security schemes in CPSs to counter vulnerabilities including phishing attacks malware injection internal stealing of data and hacking Discusses the most recent research and development on the enabling technologies for IoT based CPSs Owing to the scope and diversity of topics covered the book will be of interest not only to researchers and theorists but also to professionals material developers technology specialists and methodologists dealing with the multifarious aspects of data privacy and security enhancement in CPSs The book will provide these professionals an overview of CPS security and privacy design as well as enlighten them to promising solutions to research problems such as cyberattacks in CPS risk identification and management in CPS ML based trust computational models for CPSs nature inspired algorithms for CPSs and distributed consensus algorithms for event detection in CPSs The secondary target audience of this book includes legal practitioners hackers cyber law policymakers cyber forensic analysts and global security consortiums who may use it to further their research exposure to pertinent topics in cybersecurity

[Trends in Software Engineering](#) Marvin Zelkowitz, 2001-07-04 Volume 54 presents six chapters on the changing face of software engineering the process by which we build reliable software systems We are constantly building faster and less expensive processors which allow us to use different processes to try and conquer the bug problem facing all developments how to build reliable systems

with few errors at low or at least manageable cost The first three chapters of this volume emphasize components and the impact that object oriented design is having on the program development process a current hot topic The final three chapters present additional aspects of the software development process including maintenance purchasing strategies and secure outsourcing of scientific computations
