Adult Education as Theory, Practice and Research Robin Usher, Ian Bryant, 2014-06-23 The authors argue that the aim of research should be to improve practice through a process of critical reflection Focusing clearly on the everyday concerns and problems of practitioners they emphasize the importance of practical knowledge Their definition of practice is wide and includes the generation of theory and the doing of research as well as front line teaching They show how notions of adult learning and the adult learner have been constituted mainly through theory and research in psychology and sociology and examine action research as a mode of understanding They conclude by looking at the curriculum implications for the teaching of adult education as reflective practice

Social Work Theory and Methods Neil Thompson, Paul Stepney, 2017-10-23 This gateway text lays the foundations for a thorough knowledge of the theory and methods that social workers need Pulling together the work of a team of experts this book uses the innovative theorizing practice approach rather than the traditional applying theory to practice approach thereby providing a much more satisfactory basis for understanding the relationship between theory and practice and making it easier for practitioners to employ theory in practice Part I sets the scene by examining the relationship between theory and practice how research can be used to inform practice and the important role of policy and organizational factors Part II provides 14 chapters each exploring a different theoretical approach All in all this book provides the ideal introduction to using social work theory and methods in practice

Theorizing Praxis Paul Fairfield, 2000 Theorizing Praxis investigates the theory practice relation in philosophy particularly within the fields of hermeneutics ethics and the philosophy of education In so doing it uncovers important areas of common ground between hermeneutical and pragmatist philosophy Paul Fairfield defends a practice immanent method of theorizing which is indebted to both traditions and aims to explicitly articulate the spontaneously emergent constitutional dynamics of social practices rather than continue the project of transcendental theory construction

Disturbing Practice Avner Segall, 2002 Annotation Segall teacher education Michigan State U presents this critical analysis of teacher education based on a year long study of six social studies teacher trainees at the University of Western Canada The author raises questions about what and how teacher trainees learn do not learn and learn not to learn in preservice education courses how the structures discourses and practices in these courses encourage students to learn some things and not others and how typical teacher trainee courses

influence the classroom choices later made by graduates when they become teachers Segall argues that traditional teacher training courses encourage compliance over true critical thinking making it difficult to produce critical teachers who provide critical education in our schools Annotation c Book News Inc Portland OR booknews com
