Ilomo,1978 **Staff Communication in Libraries** Rosie Emery,1975 *Communication Throughout Libraries* Norman D. Stevens,1983 An approach to organization communication basic elements of communication organization communication training communication skills external communication *Communication and Teamwork* Hali R. Keeler,Marie Keen Shaw,2018-09-07 Support staff in all types of libraries must work together in a variety of situations This is both a textbook and on the job manual covering the skills and behaviors necessary for effective teamwork and communication Trained library support staff should know the basic concepts of interpersonal relations customer service teamwork and communication The range and diversity of staff in today s library requires that support staff understand and implement these basic principles The chapters of this book are carefully and purposefully aligned with the new American Library Association Library Support Staff Certification LSSC competency standards for Communication and Teamwork Each chapter begins with the LSSC Competencies that are to be addressed a help to instructors who use this book as a teaching text This is followed by a list of topics that will be covered as well as a glossary of key terms Chapters are then broken into easily readable sections that relate back to the key terms No other book is available that uses the ALA LSSC standards as the focus for teaching through practical examples how library support staff can effectively use them on the job Other books on this topic are written at a level that is aimed for professional librarians and not support staff However 85% of library support staff do not hold professional degrees Written in clear language this book will help library support staff become effective public service personnel *Designing and Developing Library Intranets* Nina McHale,2013-09-13 For the past decade e mail has been the preferred method of internal communication in libraries However relying on email for organizational knowledge management seems a bit like storing birth certificates car titles and deeds in a pile of junk mail the important documents are lost amongst other items of only minimal or fleeting importance A successful intranet can provide a secure place for information exchange and storage however in order to be successful a library intranet must be easy to use have the functionality desired by its users and be integrated into the daily workflows of all library staff Accomplishing this can be challenging for web librarians The book covers among other topics third party hosting the use of freely available blog and wiki software for internal staff communication and developing library intranets in ColdFusion Microsoft SharePoint and the open source Drupal content management system CMS More importantly the authors examine in detail the human factors which when not thoroughly addressed are more often the cause for a failed intranet than the technology platform This book was published as a special issue of the Journal of Web Librarianship Internal Communication Association of Research Libraries.
