Robert R. Redfield

The Goldfish:

The Goldfish Robert Lynd, 1929 Sensory Processing in Aquatic Environments Shaun P. Collin, N. Justin Marshall, 2008-04-08 Research on sensory processing or the way animals see hear smell taste feel and electrically and magnetically sense their environment has advanced a great deal over the last fifteen years This book discusses the most important themes that have emerged from recent research and provides a summary of likely future directions The book starts with two sections on the detection of sensory signals over long and short ranges by aquatic animals covering the topics of navigation communication and finding food and other localized sources The next section the co evolution of signal and sense deals with how animals decide whether the source is prey predator or mate by utilizing receptors that have evolved to take full advantage of the acoustical properties of the signal Organisms living in the deep sea environment have also received a lot of recent attention so the next section deals with visual adaptations to limited light environments where sunlight is replaced by bioluminescence and the visual system has undergone changes to optimize light capture and sensitivity The last section on central co ordination of sensory systems covers how signals are processed and filtered for use by the animal This book will be essential reading for all researchers and graduate students interested in sensory systems How the Goldfish Got Its Name

Elena Schietinger, 2021-05-10 In a beautiful peaceful jungle all of the animals get along They spend long lazy days enjoying each other and their glorious home They rest in the warm soft sun or swim in the cool refreshing water Then suddenly something unusual happens One day some birds flying high above the jungle spot a glistening pot of gold at the end of a rainbow and immediately tell all of the other jungle animals about it But soon the beauty of their treasure brings out jealousy and greed and the animals argue over who should own the gold The only jungle creatures who stay quiet and make no claim to the treasure are the plain white fish swimming in the pond deep in the jungle at the gathering place where the animals meet The fish don t think they are special enough to possess something as beautiful as the gold Then as all of the animals are arguing and proclaiming their own greatness something magical happens that changes the fish forever and teaches their jungle friends a lesson in kindness and humility With beautiful illustrations and engaging text this inspiring fable communicates a powerful message of how greed can ruin friendships and how kindness and humility are rewarded
