A New Owner's Guide to Labrador Retrievers Misty B., 2012-03-14

ABOUT THE BOOK The Labrador Retriever commonly known as the Lab was originally bred to retrieve fishing nets from the water and to catch fish which jumped off the hook The lab insured a greater catch for fishermen who had a retriever in their care As the breed evolved Labs rapidly gained popularity as a hunting dog and as a companion Today its intelligence and their ability to be trained which have made the breed indispensable in a wide variety of fields Raising Labradors is a rewarding experience for a multitude of reasons First labs are extremely popular and thus very easy to market In fact according to the American Kennel Club's rankings they have been the most popular dogs in America for more than 20 years They are energetic and loyal companions that appeal to a variety of owners because of their varied skill set They also have a fantastic personality as they are typically mild tempered and extremely intelligent

MEET THE AUTHOR Misty B is an experienced writer and a member of the Hyperink Team which works hard to bring you high quality engaging fun content Happy reading

EXCERPT FROM THE BOOK Some of the most unique and remarkable physical attributes carried by the Lab breed are directly related to their early use by fishermen The distinct interwoven pattern of their coat has unique waterproof qualities Moisture will bead up and roll off their coat making it easier for them to swim without resistance It also provides a unique layer of insulation as water does not penetrate the inner layers of the coat so that labs stay both dry and warm in damp conditions Labrador retrievers also have webbed feet which make the excellent swimmers and which make them more sure footed on rough or slick terrain Finally their tail is wide and flat designed to be used like a propeller behind the body while swimming Basic obedience training should always be completed before expecting a lab to learn a special skill set Obedience training should begin at about eight weeks and continue until the dog is well behaved and consistently responsive

New skills which target specialized purposes like service or hunting can then be added There is a separate and distinct set of standards for dogs that will be used as service animals Before a lab can qualify as a service dog it must undergo emotional stability assessments control and dexterity trials exams for physical soundness and more These tests should be performed before training begins for service skills Dogs are trained for service between eight months and a year old and generally go into service between the ages of 18 months and two years
