Handling this traditional but still captivating building material has its quirks today perhaps more than ever On the one hand it can no longer be taken for granted that stonemasonry skills will be readily available while there are also new requirements and applications not to mention damaging environmental influences that create uncertainty for planners and implementers This book is designed to provide assistance From cornice to curtain walling all details in words and sectional drawings Are you looking for a particular stone The most important domestic types of stone with supplier details Various surface treatments and their visual effect Documentation of 15 selected example applications Stone in Architecture Erhard Winkler,2013-03-14 The readers of the first two editions of *Stone Properties Durability in Man's Environment* were mostly architects restoration architects of buildings and monuments in natural stone professionals who sought basic technical information for non geologists The increasing awareness of rapidly decaying monuments and their rescue from loss to future generations have urged this writer to update the 1973 and 1975 editions now unavailable and out of print Due to the 20 year long interval extensive updating was necessary to produce this new book The present edition concentrates on the natural material stone as building stone dimension stone architectural stone and decorative field stones Recently the use of stone for thin curtain walls on buildings has become fashionable The thin slabs exposed to a new unknown complexity of stresses resulting in bowing of crystalline marble has attracted much negative publicity The costs of replacing white slabs of marble on entire buildings with its legal implications have led construction companies into bankruptcy We blame many environmental problems on acid rain Does acid rain really accelerate stone decay that much Stone preservation is being attempted with an ever increasing number of chemicals applied by as many specialists to save crumbling stone Chemists filled this need during a time of temporary job scarcity while the general geologist missed this opportunity he was too deeply involved in the search for fossil fuels and metals
