Virtual Reality Office Top:

Collaboration Potential in Virtual Reality (VR) Office Space Marko Orel, 2022-08-09 The recent shift in labour markets has heightened the demand for alternative work arrangements Virtual reality VR technology plays a significant role in this transition with remote work as efficient as work performed from an organization's own office space This book explores the impact of immersive VR technology on the new virtual workspace Specifically it examines how VR can enable employees to overcome the distractions associated with working from home increase their visibility on team projects build stronger relationships with co-workers reduce feelings of isolation due to social distancing and facilitate their engagement in collaborative work processes It also explores the limitations of two-dimensional computer-mediated communication tools for flexible working arrangements It thus offers theoretical foundations for future research on office digitalization and subsequent applications of VR technology on office work It also features the analysis of two dozen problem-centered expert interviews with creators and executives of leading productivity VR tools that enable the remote collaboration between knowledge workers

Everyday Virtual and Augmented Reality Adalberto Simeone, Benjamin Weyers, Svetlana Bialkova, Robert W. Lindeman, 2023-02-18 This edited book introduces readers to the area of Everyday Virtual and Augmented Reality With Virtual and Augmented Reality technologies becoming more pervasive in our homes and workplaces new use cases and scenarios emerge together with new challenges that need to be addressed These challenges encompass the design and implementation of appropriate VR/AR applications for ordinary environments that were not built with the explicit intention of supporting VR systems The everyday domestic environments present a range of issues that are usually not present in the physical locations purposed for VR and AR use in academic or professional environments such as constrained spaces presence of obstacles absence of instrumentation social and organizational restrictions etc To address the above challenges we collect the latest work from the Virtual Reality and Augmented Reality research community by combining the presentation of general definitions and characterization of the field of interaction concepts and techniques of a variety of use cases and areas The constellation of different environment examples from education sport to consumer and marketing from across the globe and platforms provide a comprehensive discussion on scientific and engineering methods which enable the development of VR/AR systems in everyday context
