Written for contractors and endorsed by the Associated General Contractors of America. Written specifically for contractors, this how-to book enables you to meet the challenges of green building construction. You'll discover how constructing environmentally friendly, sustainable buildings influences project management, delivery, documentation, and risk. Moreover, the book guides you through these important considerations at all phases of a green construction project, including Bidding and Contracting, Managing Green Design when the contractor works as a design-builder, Subcontracting, Procurement, Construction Management, Project Commissioning, and Closeout. This book is endorsed by the Associated General Contractors of America (AGC) and was written with the assistance and advice of a specially assembled AGC task force.
