Sequencing and Sorting in Just-In-Time Production Robert Nickel,2005-04-07 Diploma Thesis from the year 2004 in the subject Mathematics Applied Mathematics grade 1 3 Brandenburg Technical University Cottbus Institut für Mathematik language English abstract Since Karl Benz built the first motor driven vehicle in 1886 a new industry was born which is still one of the most important and influential sectors of economy His 0.9 horse power engine only reached 15 kilometers per hour but gave the starting shot for more and more inventions and a rapidly growing automobile industry First cars were used for racing only but during the first period of the twentieth century it established its position as a new and individual means of transport In 1936 the first Volkswagen called Beetle a vehicle for the masses was developed by Ferdinand Porsche and has been produced for 67 years The last Beetle was built in the summer of 2003 in Mexico Worldwide 100 000 new cars are being produced every day and in 2010 there will be over 1 billion private cars all over the world This development requires perfectly organized and well optimized production processes and still calls for new inventions and improvements The production process in automobile manufacturing splits into three major stages The moulding and welding of the car body in the body shop the painting of the welded car bodies in the paint shop and the customization of the painted car bodies in the assembly shop The work presented here deals with the last two stages The production plant contains a system of production lines which sometimes split into parallel lines and reunite to a non parallel line Each of these lines can require some set of restrictions on the cars sequenced on that line In the paint shop the cars are being painted on a line by a robot which through jets sprays the color onto the surface of the car body Whenever the next car on the line has the same color the jets can be re used Otherwise they have to be cleaned which requires time and causes pollution Therefore minimizing the color changes that occur in the paint shop can save non negligible costs In the assembly shop separate teams install different options into the cars such as sun roof air conditioning central locking system etc Therefore the order of the cars on the line has to fulfill some restrictions considering that each option requires a fixed time for installation and resources which have to be available at the time of installation

Sorting And Sequencing: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have charmed audiences this year. The Must-Read : Colleen Hoover "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papan, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
