Stone Built:

Villa Landscapes in the Roman North Ton Derks, Nico Roymans, 2025-10-01 This edited volume presents a synthesis of recent research on villas and villa landscapes in the northern provinces of the Roman world It offers an original multi dimensional perspective on the social economic and cultural functioning of villas within the context of the Roman empire Themes discussed include the economic basis of villa dominated landscapes rural slavery town country dynamics the role of monumental burials in villa landscapes and self representation and lifestyle of villa owners This study offers a major contribution to the comparative research of villa landscapes and the phenomenon of regionality in Roman rural landscapes Amsterdam Archaeological Studies is a series devoted to the study of past human societies from the prehistory up into modern times primarily based on the study of archaeological remains The series will include excavation reports of modern fieldwork studies of categories of material culture and synthesising studies with broader images of past societies thereby contributing to the theoretical and methodological debates in archaeology

Greater Medieval Houses of England and Wales, 1300-1500: Volume 3, Southern England Anthony Emery, 2006-03-09 This is the third volume of Anthony Emery's magisterial survey Greater Medieval Houses of England and Wales 1300 1500 first published in 2006 Across the three volumes Emery has examined afresh and re assessed over 750 houses the first comprehensive review of the subject for 150 years Covered are the full range of leading homes from royal and episcopal palaces to manor houses as well as community buildings such as academic colleges monastic granges and secular colleges of canons This volume surveys Southern England and is divided into three regions each of which includes a separate historical and architectural introduction as well as thematic essays prompted by key buildings The text is complemented throughout by a wide range of plans and diagrams and a wealth of photographs showing the present condition of almost every house discussed This is an essential source for anyone interested in the history architecture and culture of medieval England and Wales

The Development of Neolithic House Societies in Orkney Colin Richards, Richard Jones, 2016-04-30 Considering that Orkney is a group of relatively small islands lying off the northeast coast of the Scottish mainland its wealth of Neolithic archaeology is truly extraordinary An assortment of houses chambered cairns stone circles standing stones and passage graves provides an unusually comprehensive range of archaeological and architectural contexts Yet in the early 1990s there was a noticeable imbalance between 4th and 3rd millennium cal BC evidence with house structures and villages being well represented in the latter but minimally in the former As elsewhere in the British Isles the archaeological visibility of the 4th millennium cal BC in Orkney tends to be dominated by the monumental presence of chambered cairns or tombs In the 1970s Claude Lévi Strauss conceived of a form of social organization based upon the house soci t s maisons in order to provide a classification for social groups that appeared not to conform to established anthropological kinship structures In this approach the anchor point is the house understood as a conceptual resource that is a consequence of a strategy of constructing and legitimizing identities

under ever shifting social conditions Drawing on the results of an extensive program of fieldwork in the Bay of Firth Mainland Orkney the text explores the idea that the physical appearance of the house is a potent resource for materializing the dichotomous alliance and descent principles apparent in the archaeological evidence for the early and later Neolithic of Orkney It argues that some of the insights made by Lévi Strauss in his basic formulation of *sociétés matriarcales* are extremely relevant to interpreting the archaeological evidence and providing the parameters for a social narrative of the material changes occurring in Orkney between the 4th and 2nd millennia cal BC The major excavations undertaken during the Cuween Wideford Landscape Project provided an unprecedented depth and variety of evidence for Neolithic occupation bridging the gap between domestic and ceremonial architecture and form exploring the transition from wood to stone and relationships between the living and the dead and the role of material culture The results are described and discussed in detail here enabling tracing of the development and fragmentation of *sociétés matriarcales* over a 1500 year period of Northern Isles prehistory

Celtic from the West 3 John T. Koch, Barry Cunliffe, 2016-09-01 The Celtic languages and groups called Keltoi i.e. Celts emerge into our written records at the pre Roman Iron Age The impetus for this book is to explore from the perspectives of three disciplines archaeology genetics and linguistics the background in later European prehistory to these developments There is a traditional scenario according to which Celtic speech and the associated group identity came in to being during the Early Iron Age in the north Alpine zone and then rapidly spread across central and western Europe This idea of Celtogenesis remains deeply entrenched in scholarly and popular thought But it has become increasingly difficult to reconcile with recent discoveries pointing towards origins in the deeper past It should no longer be taken for granted that Atlantic Europe during the 2nd and 3rd millennia BC were pre Celtic or even pre Indo European The explorations in Celtic from the West 3 are drawn together in this spirit continuing two earlier volumes in the influential series

Southern Circle, Madras, 1921 *The Iron Age in Northern Britain* Dennis W. Harding, 2004-08-26 The Iron Age in Northern Britain examines the impact of the Roman expansion northwards and the native response to the Roman occupation on both sides of the frontiers It traces the emergence of historically recorded communities in the post Roman period and looks at the clash of cultures between Celts and Romans Picts and Scots Northern Britain has too often been seen as peripheral to a core located in south eastern England Unlike the Iron Age in southern Britain the story of which can be conveniently terminated with the Roman conquest the Iron Age in northern Britain has no such horizon to mark its end The Roman presence in southern and eastern Scotland was militarily intermittent and left untouched large tracts of Atlantic Scotland for which there is a rich legacy of Iron Age settlement continuing from the mid first millennium BC to the period of Norse settlement in the late first millennium AD Here D W Harding shows that northern Britain was not peripheral in the Iron Age it simply belonged
