

To reduce the database file size, select *Store only a reference to the file* (Windows) or *Store file reference* (Mac OS). However, if the file is moved or deleted, FileMaker Pro can't display the graphic. To store the graphic in the file, clear the option.

6. **Windows:** For file types .CGM, .PCX, .DRW, or .PIC, you see another dialog box. Select the applicable options, then click **OK**.

The options for inserting graphics into fields are documented in *Help*. Choose **Help menu > Contents and Index**, click the **Index** tab, and type *graphics*.

Inserting movies and QuickTime multimedia into fields

QuickTime is an application that compresses, stores, and plays multimedia files, like sound, animation, and movies. QuickTime supports many file types, including Audio Video Interleave (.AVI) and wave sound (.WAV).

Use the **Insert QuickTime** command to insert any file type supported by QuickTime. For information about the file types, refer to the Apple QuickTime web site at www.quicktime.com.

To insert movies and QuickTime multimedia into a field:

1. In **Browse** mode, click a container field.
2. Choose **Insert menu > QuickTime**.
3. In the dialog box, select the filename (change folders, if needed), then click **Open**.

Mac OS: Select **Show Preview** to see a frame of the movie.

Keep these points in mind:

- If you're inserting a MIDI file format, like .RMI, .MID, or .KAR, you must save a converted version of the file. Instructions for converting MIDI files are documented in *Help*. Choose **Help menu > Contents and Index**, click the **Index** tab, and type *MIDI files*.

- The multimedia displayed in a container field is a reference to a multimedia file. If you move the database to a different computer, move the multimedia file as well (unless you have access to it through an AppleShare network server for Mac OS).

- For information about how web users work with graphics, sound, and movies in published databases, see *FileMaker Pro Help*. Choose **Help menu > Contents and Index**, click the **Index** tab, and type *container fields*.

- You can crop or scale the first frame of a movie. See "Formatting graphics on a layout" on page 7-17.

Pasting graphics, movies, and sounds from the Clipboard

You can copy a graphic, movie, or sound from a different application to the Clipboard, then paste it into a FileMaker Pro container field.

1. Cut or copy the graphic, movie, or sound to the Clipboard.
2. In the FileMaker Pro file, switch to **Browse** mode and view the record to paste into.
3. Click the container field, then choose **Edit menu > Paste**.

Playing movies in fields

To view a QuickTime or QuickTime VR movie, click the field containing the movie, then use the movie controls.
