Bastian, 2003-08-30 This book examines the relationships between archives communities and collective memory through both the lens of a postcolonial society the United States Virgin Islands a former colony of Denmark now a United States territory and through an archival perspective on the relationship between communities and the creation of records Because the historical records of the Virgin Islands reside primarily in Denmark and the United States Virgin Islanders have had limited access to the primary sources of their history and this has affected both their ability to write their own history and to construct their collective memory But while a strong oral tradition often in competition with the written tradition influences the ways in which this community remembers it also underlines the dilemma of interpreting the history of the colonized through the records of the colonizer The story of the Virgin Islands and its search for its memory includes an exploration of how this community through public commemorations and folk tradition has formed its memory to date and the role that archives play in this process Interwoven throughout is a broader analysis of the place of archives and archivists in helping communities find their history The book is exceptionally well written and will appeal to historians archivists and those interested in the Carribean **Globalization and the Post-Creole Imagination** Patricia Marie Northover, Michaeline Crichlow, 2009-07-07 An interdisciplinary argument that the concept of cultural creolization must be expanded to encompass cultural productions by vulnerable populations living in situations of modern power inequalities anywhere in the world **The cultural construction of the British world** Barry Crosbie, Mark

Hampton,2017-03-01 What were the cultural factors that held the British world together How was Britishness understood at home in the Empire and in areas of informal British influence This book makes the case for a cultural British world and examines how it took shape in a wide range of locations ranging from India to Jamaica from Sierra Leone to Australia and from south China to New Zealand These eleven original essays explore a wide range of topics including images of nakedness humanitarianism anti slavery literary criticism travel narratives legal cultures visions of capitalism and household possessions The book argues that the debates around these issues as well as the consumer culture associated with them helped give the British world a sense of cohesion and identity This book will be essential reading for historians of imperialism and globalisation and includes contributions from some of the most prominent historians of British imperial and cultural history
