## Too Many Cooks:

Too Many Cooks Rex Stout, 2010-07-21 As Nero Wolfe prepares to speak at a gathering of the world's great chefs one is found indelicately murdered When the target for killing shifts to himself the great detective must close this case quickly or his next meal may be his last World class cuisine charming company The secret ingredient is poison Everyone knows that too many cooks spoil the broth but you'd hardly expect it to lead to murder But that's exactly what's on the menu at a five star gathering of the world's greatest chefs As guest of honor Wolfe was lured from his brownstone to a posh southern spa to deliver the keynote address He never expected that between courses of haute cuisine he and Archie would be compelled to detect a killer with a poison touch a killer preparing to serve the great detective his last supper It is always a treat to read a Nero Wolfe mystery The man has entered our folklore The New York Times Book Review A grand master of the form Rex Stout is one of America's greatest mystery writers and his literary creation Nero Wolfe is one of the greatest fictional detectives of all time Together Stout and Wolfe have entertained and puzzled millions of mystery fans around the world Now with his perambulatory man about town Archie Goodwin the arrogant gourmandizing sedentary sleuth is back in the original seventy three cases of crime and detection written by the inimitable master himself Rex Stout *Case-Based Learning* Janet L. Kolodner, 2012-12-06 Case based reasoning means reasoning based on remembering previous experiences A reasoner using old experiences cases might use those cases to suggest solutions to problems to point out potential problems with a solution being computed to interpret a new situation and make predictions about what might happen or to create arguments justifying some conclusion A case based reasoner solves new problems by remembering old situations and adapting their solutions It interprets new situations by remembering old similar situations and comparing and contrasting the new one to old ones to see where it fits best Case based reasoning combines reasoning with learning It spans the whole reasoning cycle A situation is experienced Old situations are used to understand it Old situations are used to solve a problem if there is one to be solved Then the new situation is inserted into memory alongside the cases it used for reasoning to be used another time The key to this reasoning method then is remembering Remembering has two parts integrating cases or experiences into memory when they happen and recalling them in appropriate situations later on The case based reasoning community calls this related set of issues the indexing problem In broad terms it means finding in memory the experience closest to a new situation In narrower terms it can be described as a two part problem assigning indexes or labels to experiences when they are put into memory that describe the situations to which they are applicable so that they can be recalled later and at recall time elaborating the new situation in enough detail so that the indexes it would have if it were in the memory are identified Case Based Learning is an edited volume of original research comprising invited contributions by leading workers This work has also been published as a special issues of MACHINE LEARNING Volume 10 No 3 *An Asperger Dictionary of Everyday Expressions* Ian Stuart-Hamilton, 2007 This revised and expanded edition has over 5000 explanations that help unlock the
