*Federal Register*, 2012-04      Small Railroads John D. Bitzan, Denver D. Tolliver, Douglas E. Benson, 2002 Railroads play an important role in the U S transportation system Annually railroads haul more than 1.5 billion tons of freight for an average distance of more than 750 miles with a value of more than 319 billion For some products the role of railroads in the U S is even more pronounced Railroads serve as an important transporter of many of the low valued bulky natural resource commodities produced in the U S such as coal grain fertilizer and basic chemicals Short line railroads non Class I railroads account for 29% of all U S rail miles operated 12% of all U S railroad employees and 9% of all U S railroad freight revenue Although short line railroads comprise a small portion of U S freight revenues they serve as an important feeder into the nation s large Class I railroads It is estimated that nearly 14 000 shippers rely on short lines for access to the nation s rail system However a recent change in the industry standard for the size of rail cars interchanged between railroads could threaten viability of the nation s short line network The old industry standard of 263 000 pound cars is being replaced with an industry standard of 286 000 pound cars Many short line railroads can not handle these larger cars as they have light rail in place shallow or poor ballast and or deferred tie maintenance In many cases the traffic levels available to short line railroads may not justify a major upgrade to handle these larger rail cars In other cases financing at terms agreeable to the short line operator may not be available This study examines 1 capital investment needs facing the short line industry 2 terms available for meeting these needs 3 public interest benefits of short line railroads and 4 the relationship of short line railroad services to the statutory responsibilities of the Secretary of Transportation      Railroad Vistas 3 Paul Roth, 2012-07-12 This is a collection of photographs which depict examples of vintage diesel locomotives which served on various mid size and small railroads The time period of the photos is 1955-2011 It is important for the reader to understand that by the mid 1970s although there were originally half dozen or so US manufacturers of diesel locomotives only General Motors and General Electric were producers with GE still a minority supplier In the book many examples of those locomotives built by the non GM manufacturers are displayed along with a preponderance of vintage GMs manufactured by the early 1970s The objective is to provide a wide variety of historical equipment in operation With one exception the locomotives shown were all in service or stored serviceable      *Small Town*, 1997      **Manual of the Railroads of the United States**, 1878      **Railroads** William Zebina Ripley, 1920      Annual Report of the Railroad Commission of Indiana Railroad Commission of Indiana, 1913      The Economics of Railroad Construction Walter Loring Webb, 1912      **The American and English Railroad Cases**, 1901      Buildings and Structures of American Railroads Walter Gilman Berg, 1893      **Annual Report** Railroad Commission of Indiana, 1913      **The Railroads of Mexico** Fred Wilbur Powell, 1921      *Railroad Herald*, 1920      **American Colonial Policy and Administration** American Academy of Political and Social Science, 1907      **Transactions of the American Society for Steel Treating** American Society for Steel Treating, 1923
