**Psychology of Intelligence Analysis** Richards J. Heuer,2006 This volume pulls together and republishes with some editing updating and additions articles written during 1978 86 for internal use within the CIA Directorate of Intelligence Four of the articles also also appeared in the Intelligence Community journal Studies in Intelligence during that time frame The information is relatively timeless and still relevant to the never ending quest for better analysis The articles are based on reviewing cognitive psychology literature concerning how people process information to make judgments on incomplete and ambiguous information I selected the experiements and findings that seem most relevant to intelligence analysis and most in need of communication to intelligence analysts Cognitive psychologists and decision analysts may complain of oversimplification while the nonpsychologist reader may have to absorb some new terminology Unfortunately mental processes are so complex that discussion of them does require some specialized vocabulary Intelligence analysts who have read and thought seriously about the nature of their craft should have no difficulty with this book **Intelligence Tests in Relation to the Analysis of Intelligence** Grace Lyman,1914 **Intelligence Analysis** Robert M. ### **The Analysis of Intelligence**

Joy Paul Guilford, Ralph Hoepfner, 1971 Intelligence Analysis in the Digital Age Stig Stenslie, Lars Haugom, Brigit H.

Vaage, 2021-08-05 This book examines intelligence analysis in the digital age and demonstrates how intelligence has entered a new era While intelligence is an ancient activity the digital age is a relatively new phenomenon This volume uses the concept of the digital age to highlight the increased change complexity and pace of information that is now circulated as new technology has reduced the time it takes to spread news to almost nothing These factors mean that decision makers face an increasingly challenging threat environment which in turn increases the demand for timely relevant and reliable intelligence to support policymaking In this context the book demonstrates that intelligence places greater demands on analysis work as the traditional intelligence cycle is no longer adequate as a process description In the digital age it is not enough to accumulate as much information as possible to gain a better understanding of the world To meet customers needs the intelligence process must be centred around the analysis work which in turn has increased the demand for analysts

Assessments not least predictions are now just as important as revealing someone else s secrets This volume will be of much interest to students of intelligence studies security studies and international relations

offers the Director of National Intelligence DNI recommendations to address many of the IC's challenges Intelligence Analysis for Tomorrow asserts that one of the most important things that the IC can learn from the behavioral and social sciences is how to characterize and evaluate its analytic assumptions methods technologies and management practices Behavioral and social scientific knowledge can help the IC to understand and improve all phases of the analytic cycle how to recruit select train and motivate analysts how to master and deploy the most suitable analytic methods how to organize the day to day work of analysts as individuals and teams and how to communicate with its customers The report makes five broad recommendations which offer practical ways to apply the behavioral and social sciences which will bring the IC substantial immediate and longer term benefits with modest costs and minimal disruption

Treverton, Claybourne Bryan Gabbard, 2008 This report assesses the tradecraft of intelligence analysis across the main U.S. intelligence agencies such as the Central Intelligence Agency and the National Security Agency and recommends improvements The report makes a number of recommendations for improving analysis for a world of threats very different from that of the Cold War It focuses on the two essentials of analysis first people second the tools they have available The December 2004 intelligence reform legislation set in motion initiatives that move in the right direction The creation of a Deputy Director of National Intelligence for Analysis will provide a real hub for developing tradecraft and tools and for framing critical tradeoffs The establishment of a National Intelligence University will provide a focal point for training in analysis The creation of a National Counterterrorism Center will shift intelligence analysis toward problems or issues not agencies or sources The building of a Long Term Analysis Unit at the National Intelligence Council can lead away from the prevailing dominance of current intelligence And the formation of an Open Source Center can create a seed bed for making more creative use of open source materials These specific initiatives are promising but they are just the beginnings For all the language about the importance of intelligence analysis data sharing fusion and the like the national and Intelligence Community leadership today devalues intelligence analysis A fundamental change is also needed in attitudes and existing organizational cultures
