Snow When Will It Fall:

Astrology Osho,2013-06-10 In this fascinating volume Osho reclaims astrology from the pop psychologists and fortune tellers and shares the deep insights that first brought this unique science of the stars into being From ancient India to the lost civilization of Sumeria from Pythagoras to Paracelsus to Piccardi we discover that for thousands of years there has been a thread of awareness of how all things in the universe are interconnected an awareness that modern physics is still struggling to define in scientific terms today As Osho says The universe is a living body an organic unity In it nothing is isolated all is connected Whatever is far away is connected to that which is near nothing is separate So no one should remain in the fallacy that he is an island isolated separate aloof Everything is connected to the whole and everything is all the time affecting others and being affected by others Astrology aficionados and skeptics alike will find something in this small volume to provoke a new way of looking at what really makes the world go round Climatological Data for the United States by
