Calculating Engines Charles Babbage,1984-09-01 [The Difference Engine](#) Doron Swade,Charles Babbage,2001 In 1821 an inventor and mathematician Charles Babbage was poring over a set of mathematical tables Finding error after error Babbage exclaimed I wish to God these calculations had been executed by steam His frustration was not simply at the grindingly tedious labor of checking manually evaluated tables but at their daunting unreliability Science engineering construction banking and insurance depended on tables for calculation Ships navigating by the stars relied on them to find their positions at sea Babbage launched himself on a grand venture to design and build mechanical calculating engines that would eliminate such errors His bid to build infallible machines is a saga of ingenuity and will which led beyond mechanized arithmetic into the entirely new realm of computing Through Ada Countess of Lovelace and daughter of Lord Byron we gain tantalizing insights into how at least one Victorian glimpsed the promise of what was to come Babbage springs out of history like a jack in the box a gentleman philosopher a tireless inventor a vigorous socialite and a mesmerizing raconteur Mr Babbage is coming to dinner was a coup for any hostess Drawing on previously unused archival material [The Difference Engine](#) is a tale of both Babbage s nineteenth century quest to build a calculating engine and its twentieth century sequel For in 1991 Babbage s vision was finally realized at least in part by the completion at the Science Museum in London of the first full sized Babbage engine finished in time for the 200th anniversary of Babbage s birth The two quests are mutually illuminating and are recounted here by the then Curator of Computing Doron Swade one of the main protagonists of the successful resumption of Babbage s extraordinary work
