

The Harvard Business School Center for Digital Learning has developed this questionnaire to help you

The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed for the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the people you want to work for. This includes understanding their work styles, their preferences for work environments, and their needs for flexibility and autonomy.

The way to build a hybrid work model is to start with the people and work backwards. This means understanding the needs and preferences of the people you want to work for, and then designing a hybrid work model that meets those needs.

How do you know if you've got it right? A successful hybrid workplace model will have high employee satisfaction and engagement, and it will support the organization's goals and objectives. If you want the questionnaire to be effective, you need to ask the right questions.

At Harvard Business School, we've developed a questionnaire that can help you understand the needs and preferences of your people, and design a hybrid work model that meets those needs. It's a free tool, and it's available to everyone.
