Kibbie and co Jennie Chappell, 1906 *The World of Animals* Joseph Wood Krutch, 1961 This collection of writings selected from a vast literature about animals contributes something to an over all picture of human beings relations with and attitudes toward the animal kingdom

The World of Animals Joseph Krutch, 2017-07-12 Human beings share the earth with many other living creatures and have dealt with them in many different ways Animals have furnished humans with food done their work aroused their curiosity provided them with sport stimulated their sense of beauty and provoked their wonder They have also shared affection when both the human and animal have decided to give it No less varied or avoidable are the attitudes humans have developed toward these creatures This collection of writings selected from a vast literature about animals is also about the people who have been inspired to write on that subject Sometimes consciously and sometimes unconsciously the writer implies an answer to one or more of the questions that any concern with an animal must raise such as What is an animal s place in nature Are they here primarily to serve as a food source Do they possess inherent rights and privileges How are they alike or different from humans The answers to these questions are as varied as the authors Each narrative description or exposition contributes something to an over all picture of human beings relations with and attitudes toward the animal kingdom It is a remarkable conclusion illustrated by Krutch s chronological arrangement within categories that almost every major attitude and activity that has ever existed concerning animals still exists today even though there has been a drift in certain directions Although the editor fairly represents the opposing view his sympathies lie with those for whom the animal world embodies something to be loved and learned from rather than merely to be studied or exploited

The Atlantic Monthly, 1920 *Atlantic Monthly*, 1919 **Report of Investigations**, 1968 **The Child's Conception of Language** A. Sinclair, R. J. Jarvella, W. J. M. Levelt, 2013-03-12 It is obvious that the growing child manifests an increasing understanding of his language and facility to use it A major part of the child lan guage literature is concerned with the child s developing linguistic and communicative competence Scattered evidence also shows however that children become progressively more

aware of language as Zanguage It is interesting to consider in what ways the internal structure and mechanisms of language become more accessible Little is known about linguistic awareness of this kind the role it plays or how it develops When the new Projektgruppe für Psycholinguistik of the Max Planck Gesellschaft was founded the child's conception of language in analogy to Piaget's child's conception of the physical world become one of the research unit's topics of study As previous work on linguistic awareness was largely amorphous we first organized a kind of conference workshop with some of those who had worked in the area The aims of this meeting were to map out the field of study detail the phenomena of interest and define major theoretical issues The meeting took place just after the creation of the project group on May 3 7 1977 The participants were psychologists and linguists who had either published work on metalinguistic issues in child language or who could be expected to contribute substantially to the discussion This book is a direct outcome of that conference though it is not a complete reflection of the papers presented or of the discussion that took place *The Academy*, 1906
