Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating A.T. Fomenko,2013-04-17 We present certain empirico statistical methods for the analysis of narrative and numerical data extracted from different texts of historical character such as chronicles or annals They are based on several statistical principles worked out by the author and originally reported at the Third International Vilnius Conference on Probability Theory and Mathematical Statistics in 1981 The principal results were published in the papers 15 32 293 299 304 319 and in the book A T Fomenko Methods for Statistical Analysis of Narrative Texts and Applications to Chronology Moscow Univ Press Moscow 1990 in Russian See also Part 1 The methods are applied to the problem of correct dating of the events in ancient and medieval history These results induce conjectures on the redating of some important ancient historical events Generally speaking we might say that the commonly accepted Modern Text book of ancient and medieval European Mediterranean Egyptian and Middle Eastern history is a fibered layered chronicle obtained by gluing together four nearly identical copies of a shorter original chronicle The other three chronicles are obtained from the original chronicle by redating and renaming the events described in them we rigidly move the original chronicle in its entirety backwards in time by approximately 333 1053 and 1778 years Thus the full Modern Textbook can be reconstructed from its smaller part namely from the original chronicle for the 9 17th cc A D See Appendix 1 Figs 101 104 The First Easter Dawn Charles Turner Gorham,1908 **The First Easter** Penny Frank,1994 Retells what happened after the priests in Jerusalem had Jesus killed The Very First Easter Paul L.
