Local Climate Action Planning Michael R. Boswell,Adrienne I. Greve,Tammy L. Seale,2012-07-16 Climate change is a global problem but the problem begins locally Cities consume 75% of the world s energy and emit 80% of the world s greenhouse gases Changing the way we build and operate our cities can have major effects on greenhouse gas emissions Fortunately communities across the U S are responding to the climate change problem by making plans that assess their contribution to greenhouse gas emissions and specify actions they will take to reduce these emissions This is the first book designed to help planners municipal staff and officials citizens and others working at local levels to develop Climate Action Plans CAPs are strategic plans that establish policies and programs for mitigating a community s greenhouse gas GHGs emissions They typically focus on transportation energy use and solid waste and often differentiate between community wide actions and municipal agency actions CAPs are usually based on GHG emissions inventories which indentify the sources of emissions from the community and quantify the amounts Additionally many CAPs include a section addressing adaptation how the community will respond to the impacts of climate change on the community such as increased flooding extended drought or sea level rise With examples drawn from actual plans Local Climate Action Planning guides preparers of CAPs through the entire plan development process identifying the key considerations and choices that must be made in order to assure that a plan is both workable and effective

An Introduction to Sustainable Tourism Alexandra Coghlan,2019-03-31 A comprehensive and realistic look at integrating sustainability into tourism It adopts a systems

perspective and combines theoretical and applied knowledge with a scaffolded learning approach to take a comprehensive look at practical management tools certifications and innovation to implementing sustainable tourism *ETHICS: Endorse Technologies for Heritage Innovation* Alessandra Battisti, Serena Baiani, 2024-01-04 This book outlines within the Italian national framework the current and potential paths oriented towards a new concept of Architectural Heritage through actions referring to Innovation and Experimentation and Protection and Transformation of the Architectural Heritage The development of the themes is articulated in two sessions dealing with the aspects related to the analysis and mapping of Architectural Heritage to face the context of the current Climate Crisis and the development of projects and experimentations oriented to the Green and Digital Transition The evolution of the concept of Heritage as conceived by the United Nations 2030 Agenda and in the Green Deal and New European Bauhaus aimed at constructing an inclusive and universally recognised definition to support supranational objectives of sustainable human development gives rise to innovative strategies methodologies and technologies that in a direction of mitigation contrast and adaptation to climate change allow for the safeguard renewed management and a hope for valorisation of Heritage on a national scale In this direction the understanding of Architectural Heritage as a non renewable resource determines the need to activate design experimentation laboratories oriented towards regeneration articulated and complex which require in order to respond to the challenges posed by our era a sensitive and dialogic multidisciplinary vision of a holistic type In fact on the one hand it is necessary to redefine the usability and management methods of built heritage through the adoption of digital mobility energy ecological social green and blue infrastructures on the other hand it is necessary to introduce new qualitative and quantitative parameters and performance indicators adequate to verify the validity of the implemented strategies in a perspective of adaptation to climate change able to clarify contents processes and tools to contrast future risks The pursuit of these objectives refers to the innovation of training paths professionalising procedures administrative regulations and public policies that involve citizens and the private partnership towards a different project qualification and empowerment of stakeholders inhabitants professionals and clients The Technological Project makes it possible to activate different interventions aimed at acting in an integrated manner on assets context and communities according to an approach that reinterprets them on a common score as proposed by the European Next Generation programme in three priority aspects digitalisation and innovation environmental transition increased resilience and social sustainability of national economies In this scenario the interventions aimed at outlining sustainable development actions will have to place these concepts at the centre in a harmonious vision that starts from the recognition and enhancement of the Architectural Heritage recognising it as a fundamental asset of the territories

Enabling Renewable Energy, Energy Storage, Demand Response, and Energy Efficiency with a Community-based Master Controller-optimizer Byron Washom, 2013 *Sustainable Retrofitting of Commercial Buildings* Simon Burton, 2014-10-03 Whilst sustainability is already an important driver in the new

building sector this book explores how those involved in refurbishment of commercial building are moving this agenda forward It includes chapters by developers surveyors cost consultants architects building physicists and other players on the role they each can play in enabling refurbishment to be commercially environmentally and socially sustainable Case studies from northern climates show real examples of different building types ages and uses and will demonstrate what action has been taken to create more sustainable buildings The chapters raise and discuss all the relevant issues that need to be considered in retrofitting decision making Changing standards planning process management financing technical issues site organisation commissioning and subsequent building management are all considered The book demonstrates that buildings can be made comfortable to occupy easy to manage and low in energy demand and environmental impact

Solar Photovoltaic Project Development Herbert Wade,2003 Countries around the world face increasing needs regarding the provision of environmentally sound and sustainable energy Developing countries in particular face situations of limited energy resources especially with regard to the provision of electricity in rural areas There is an urgent need to address this constraint to social and economic development This situation however presents significant opportunities and challenges for the greater use of renewable energy Particular interest has focused on the use of solar photovoltaic systems for domestic use in rural areas This book is intended primarily as a teaching aid to support the Technical Training Manual which contains detailed text and graphics and to discuss wider issues relating to project development for photovoltaic solar systems The overall goal of the Toolkit is to provide comprehensive information and training material on the installation operation monitoring and evaluation management maintenance rehabilitation awareness raising advocacy innovation policy and planning for PV systems The Toolkit has its origins in material first produced in the Pacific where solar photovoltaics and rural electrification were pioneered in the 1970s and 1980s Facing the threats of global warming and sea level rise small island states have a particular interest in the success of renewable energy for sustainable development
