Mariprasath, V. Kirubakaran, 2019-11 Renewable energy sources are currently a particularly pressing need as we all have become addicted to the usage of electrical energy The extraction of fossil fuels has to be reduced as they are depleting at an ever increasing rate which is due to the increase in population and the subsequent rapid urbanization As a consequence research into both power saving electrical appliances and feasible energy sources is ongoing Thus it is necessary that future energy sources should be reliable renewable and eco friendly This book includes discussion about renewable energy resources like wind and solar power plants and a comparison between renewable and non renewable energy sources with valid data from various case studies In addition the impact of fossil fuelled power plants on the environment is discussed and real time datum from the energy audit of solar power plant are given The advantages of renewable resources over conventional ones are also explored in detail      *Recent Trends in the Law and Policy of Bioenergy Production, Promotion and Use* Charlotta Jull, 2007 In recent years there has been increasing recognition of the need for sound regulatory frameworks for bioenergy Faced with high petroleum and natural gas prices and increasingly aware of climate change and

environmental concerns many countries are implementing national policies and legislation to encourage bioenergy production and use These developments stem from the desire to achieve energy security and self sufficiency the need to reduce reliance on foreign fossil fuel reserves and the hope of providing increased trade opportunities for some agricultural commodities Land use and the competing needs of energy and food security are key issues in the bioenergy debate International and national regulatory frameworks will have to establish clear guidelines for the sustainable development of the bioenergy industry This paper aims to stimulate discussion on the elements of appropriate national legal frameworks for bioenergy particularly in developing countries It provides legislators and policy makers with a tool to assist in identifying areas of law which may affect bioenergy regulation and in designing key elements of national bioenergy laws
