Wilkes, 1996 **Necroculture** Charles Thorpe, 2016-06-24 In this book the author draws on Karl Marx's writings on alienation and Erich Fromm's conception of necrophilia in order to understand these aspects of contemporary culture as expressions of the domination of the living by the dead under capitalism Necroculture is the ideological reflection and material manifestation of this basic feature of capitalism the rule of dead capital over living labor The author argues that necroculture represents the subsumption of the world by vampire capital

Ecology Against Capitalism John Bellamy Foster, 2002-02-01 In recent years John Bellamy Foster has emerged as a leading theorist of the Marxist perspective on ecology His seminal book Marx's Ecology Monthly Review Press 2000 discusses the place of ecological issues within the intellectual history of Marxism and on the philosophical foundations of a Marxist ecology and has become a major point of reference in ecological debates This historical and philosophical focus is now supplemented by more directly political engagement in his new book Ecology against Capitalism In a broad ranging treatment of contemporary ecological politics Foster deals with such issues as pollution sustainable development technological responses to environmental crisis population growth soil fertility the preservation of ancient forests and the new economy of the Internet age Foster's introduction sets out the unifying themes of these essays enabling the reader to draw from them a consolidated approach to a rapidly expanding field of debate which is of critical importance in our times Within these debates on the politics of ecology Foster's work develops an important and distinctive perspective Where many of these debates assume a basic divergence of red and green issues and are concerned with the exact terms of a trade off between them Foster argues that Marxism properly understood already provides the framework within which ecological questions are best approached This perspective is advanced here in accessible and concrete form taking account of the major positions in contemporary ecological debate City Project and Public Space Silvia Serreli, 2013-06-20 The book aims at nurturing theoretic reflection on the city and the territory and working out and applying methods and techniques for

improving our physical and social landscapes The main issue is developed around the projectual dimension with the objective of visualising both the city and the territory from a particular viewpoint which singles out the territorial dimension as the city's space of communication and negotiation Issues that characterise the dynamics of city development will be faced such as the new fresh relations between urban societies and physical space the right to the city urban equity the project for the physical city as a means to reveal civitas signs of new social cohesiveness the sense of contemporary public space and the sustainability of urban development Authors have been invited to explore topics that feature a pluralism of disciplinary contributions studying formal and informal practices on the project for the city and seeking conceptual and operative categories capable of understanding and facing the problems inherent in the profound transformations of contemporary urban landscapes
