Control and Fate of Atmospheric Trace Metals Jozef M. Pacyna, Brynjulf Ottar, 1989-03-31 The increasing production of industrial goods heat and energy as well as traffic has led to the release of considerable amounts of toxic trace metals to the atmosphere The result is elevated concentrations of toxic metals in local populations and eco systems Recently the problem of atmospheric long range transport of trace metals has also been recognized Significant amounts of these pollutants are disposed and deposited both on regional and global scales In the atmosphere they may influence the chemical reactions Of particular interest is their catalytic effect on the oxidation processes taking place in water droplets or on the surface of wet particles e g the oxidation of sulphur dioxide to sulphate however the main environmental impact starts when the atmospheric trace metals are deposited on ground and vegetation and subsequently brought into the water circulation During the later years significant progress has been made in the development of equipment to reduce and control the atmospheric emissions of toxic trace metals This particularly applies to electrostatic precipitators and wet scrubbers for the collection of fine particles The main objective of the workshop was to survey present knowledge concerning the sources atmospheric fluxes sinks and chemical impact of the atmospheric trace metals and to review the developments of emission control equipment and the perspectives to reduce the potential risks from toxic metals During the first two days of the meeting 15 invited review papers were presented

Oxford Studies in Ancient Philosophy : Volume XXXIV David Sedley, 2008-05-29 Oxford Studies in Ancient Philosophy is a volume of original articles on all aspects of ancient philosophy The articles may be of substantial length and include critical notices of major books OSAP is now published twice yearly in both hardback and paperback The serial Oxford Studies in Ancient Philosophy OSAP is fairly regarded as the leading venue for publication in ancient philosophy It is where one looks to find the state of the art That the serial which presents itself more as an anthology than as a journal has traditionally allowed space for lengthier studies has tended only to add to its prestige it is as if OSAP thus declares that since it allows as much space as the merits of the subject require it can be more entirely devoted to the best and most serious scholarship Michael Pakaluk Bryn Mawr Classical Review
