Synchronous

Request-response model

Send a request and wait for some response
Example: API requests

Asynchronous

Fire and forget model

Send message/event and forget
Example: Event Driven Architecture

Advanced Async Communication

Scott C. Dulebohn

Advanced Async Communication:

Recent Advances in the Message Passing Interface Claudia Blaas-Schenner, Christoph Niethammer, Tobias Haas, 2024-09-24 This volume LNCS constitutes the refereed proceedings of 31st European MPI Users Group Meeting EuroMPI 2024 held in Perth WA Australia during September 25 27 2024 The 8 full papers presented here were carefully reviewed and selected from 19 submissions These papers have been categorized under the following topical sections Compile time Correctness checks and optimization Limitations and Extensions for GPGPUs in MPI Improvements for MPI and MPI Ecosystem

Low-Power Processors and Systems on Chips Christian Pigué, 2018-10-03 The power consumption of microprocessors is one of the most important challenges of high performance chips and portable devices In chapters drawn from Pigué's recently published Low Power Electronics Design this volume addresses the design of low power microprocessors in deep submicron technologies It provides a focused reference for specialists involved in systems on chips from low power microprocessors to DSP cores reconfigurable processors memories ad hoc networks and embedded software Low Power Processors and Systems on Chips is organized into three broad sections for convenient access The first section examines the design of digital signal processors for embedded applications and techniques for reducing dynamic and static power at the electrical and system levels The second part describes several aspects of low power systems on chips including hardware and embedded software aspects efficient data storage networks on chips and applications such as routing strategies in wireless RF sensing and actuating devices The final section discusses embedded software issues including details on compilers retargetable compilers and coverification tools Providing detailed examinations contributed by leading experts Low Power Processors and Systems on Chips supplies authoritative information on how to maintain high performance while lowering power consumption in modern processors and SoCs It is a must read for anyone designing modern computers or embedded systems

Low-Power Electronics Design Christian Pigué, 2018-10-03 The power consumption of integrated circuits is one of the most problematic considerations affecting the design of high performance chips and portable devices The study of power saving design methodologies now must also include subjects such as systems on chips embedded software and the future of microelectronics Low Power Electronics Design covers all major aspects of low power design of ICs in deep submicron technologies and addresses emerging topics related to future design This volume explores in individual chapters written by expert authors the many low power techniques born during the past decade It also discusses the many different domains and disciplines that impact power consumption including processors complex circuits software CAD tools and energy sources and management The authors delve into what many specialists predict about the future by presenting techniques that are promising but are not yet reality They investigate nanotechnologies optical circuits ad hoc networks e textiles as well as human powered sources of energy Low Power Electronics Design delivers a complete picture of today's methods for reducing power and also illustrates the advances in chip design that may be commonplace 10

or 15 years from now **StarBriefs Plus** Andre Heck,2004-03-31 With about 200 000 entries StarBriefs Plus represents the most comprehensive and accurately validated collection of abbreviations acronyms contractions and symbols within astronomy related space sciences and other related fields As such this invaluable reference source and its companion volume StarGuides Plus should be on the reference shelf of every library organization or individual with any interest in these areas Besides astronomy and associated space sciences related fields such as aeronautics aeronomy astronautics atmospheric sciences chemistry communications computer sciences data processing education electronics engineering energetics environment geodesy geophysics information handling management mathematics meteorology optics physics remote sensing and so on are also covered when justified Terms in common use and or of general interest have also been included where appropriate **The Brave New World of eHR** Hal Gueutal,Dianna L. Stone,2015-02-27 The Brave New World of eHR is an important resource filled with the most current information and practical advice on eHR for human resource professionals and industrial and organizational psychologists Written by an expert group of scholars practitioners and subject matter experts this book offers an overview of the major technological trends in eHR and shows how to use technology to enhance organizational effectiveness Comprehensive in scope the book includes information on a wide variety of topics and Reviews the transformation of human resources from manual processes to sophisticated CRM and ERP systems Examines the effectiveness of online strategies for attracting talent Offers valuable guidelines that can help organizations design deliver implement and sustain e selection systems Includes a review of the recent research on the effectiveness of distance learning in educational and organizational settings Analyzes the potential advantages and disadvantages of using eHR to manage employee performance Shows how technology supports the administration of compensation systems Outlines recent trends in delivering HR products and services Considers the functional and dysfunctional consequences of using eHR to attract select and manage the performance of employees in organizations Presents a fascinating and futuristic look at HR and technology for decades to come **Communications and Networking for the IBM PC and Compatibles** Larry E. Jordan,Bruce Churchill,1990 Introduces the personal computer novice to the spectrum of data communications and networking capabilities of the IBM PC and Personal System 2 families Describes both hardware and software facets No bibliography Annotation copyrighted by Book News Inc Portland OR *Mastering the Art of Network Programming: Unraveling the Secrets of Expert-Level Programming* Steve Jones,2025-02-21 Unlock the intricacies of cutting edge network programming with Mastering the Art of Network Programming Unraveling the Secrets of Expert Level Programming This comprehensive guide is crafted for seasoned developers eager to excel in network programming by mastering advanced techniques and strategies Explore the depths of socket programming discover asynchronous communication methods and navigate complex protocols all while ensuring security and robustness in networked applications Delve into the core principles of scalability and performance optimization essential for modern network applications accommodating increasing demands and maintaining

peak efficiency Through detailed chapters on HTTP 2 gRPC and cloud based solutions this book equips you with the knowledge to leverage the latest technologies ensuring your applications remain at the forefront of innovation Real world case studies and practical insights further reinforce the expertise shared providing invaluable guidance to implement these technologies effectively Whether you aim to enhance application robustness improve scalability or optimize network performance this book serves as an indispensable resource The structured approach and in depth exploration of topics empower developers to build secure efficient and scalable network applications Embrace this opportunity to advance your skills and navigate the complexities of network programming to achieve expert level proficiency
