## **Biohacking Best:**

**Biohackers Magazine Issue 17** , When one experiences a new product a new treatment or a new idea there s little that compares to the feelings of excitement and hope that rush in fueling one s faith in the upright direction of humanity I just recently attended the 8th Annual Biohacking Conference hosted by Dave Asprey in LA and like each biohacking event I left feeling inspired to say the least Everything I saw every person I met and every biohack I experienced further fed my appetite to share these great ideas and practices with the world a world hungering for the opposite approach of industrialized medicine Now of course not every biohack is exactly 100% proven Suffice it to say there are many that are still in the process of collecting data from studies and clinical trials However those that have stood up to the modern pill popping regimes and have adamantly supported their ideas on the foundations of strong scientific data are truly examples to be held in high regard I was impressed with the many products and companies at the conference that held a mission of dedicated service to fellow mankind Yes like in any startup industry or even industry for that matter there are those who are looking to push some falsehood to scheme people into buying their product or services But as we know the companies that rise to the top are those that stick to the cardinal virtues that make up all of us Prudence Justice Fortitude and Temperance The Biohacking Industry is outgrowing its mold and soon a new layer of enthusiasts will be added This is something that should enthrall us but it shouldn t permit us to lose sight of the foundational attributes that make and will continue to make us biohackers for the rest of our lives Essentially we are all after freedom freedom from disease freedom from injury freedom from hysteria and freedom from aging Responsible Biohacking is perhaps the best way towards that freedom and we must continually adjust our sails to catch the winds that stem from truth and service That is what we at Biohackers Magazine strive towards serving the community through the provision of information carefully discerned and attuned to the values of sincerity and science

Biohack Your Morning: Ice, Light and Silence Maya Colton, 2026-03-10 The first hour of the day is not neutral It is being shaped by something either by habit by default or by deliberate choice For a growing number of people that choice involves cold natural light and quiet Not as a performance of optimization but as a genuine attempt to begin the day from a more grounded place Biohack Your Morning explores what happens when three simple evidence informed practices are combined into a consistent morning ritual cold exposure that activates physical alertness natural light that anchors the body's internal clock and silence that allows the mind to settle before the noise begins It examines not just the physiological reasoning behind each practice but the interior experience of building a morning that actually belongs to you This book offers insight into why mornings so often feel reactive rather than intentional and how small deliberate interventions can quietly shift the emotional and mental tone of an entire day It reframes biohacking not as a pursuit of peak performance but as a return to the basic conditions under which a human being functions with more clarity steadiness and self awareness For anyone who has sensed that their mornings are running them rather than the other way around this book explores a simpler more honest approach to reclaiming that first hour
