Sound Design and Science Fiction William Whittington, 2021 Sound is half the picture and since the 1960s film sound not only has rivaled the innovative imagery of contemporary Hollywood cinema but in some ways has surpassed it in status and privilege because of the emergence of sound design This in depth study by William Whittington considers the evolution of sound design not only through cultural and technological developments during the last four decades but also through the attitudes and expectations of filmgoers Fans of recent blockbuster films in particular science fiction films have come to expect a more advanced and refined degree of film sound use which has changed the way they experience and understand spectacle and storytelling in contemporary cinema The book covers recent science fiction cinema in rich and compelling detail providing a new sounding of familiar films while offering insights into the constructed nature of cinematic sound design This is accomplished by examining the formal elements and historical context of sound production in movies to better appreciate how a film sound track is conceived and presented Whittington focuses on seminal science fiction films that have made specific advances in film sound including 2001 A Space Odyssey THX 1138 Star Wars Alien Blade Runner original version and director's cut Terminator 2 Judgment Day and The Matrix trilogy and games milestones of the entertainment industry's technological and aesthetic advancements with sound

Setting itself apart from other works the book illustrates through accessible detail and compelling examples how swiftly such advancements in film sound aesthetics and technology have influenced recent science fiction cinema and examines how these changes correlate to the history theory and practice of contemporary Hollywood filmmaking Sound Design is the New Score Danijela Kulezic-Wilson,2019-11-01 Sound Design is the New Score explores the new trend of blurring the line between score and sound design which has transformed contemporary film soundscape by rejecting the conventions of classical scoring and challenging the modes of perception it shaped **Doing Research in Sound Design** Michael Filimowicz,2021-11-23 Doing Research in Sound Design gathers chapters on the wide range of research methodologies used in sound design Editor Michael Filimowicz and a diverse group of contributors provide an overview of cross disciplinary inquiry into sound design that transcends discursive and practical divides The book covers Qualitative Quantitative and Mixed Methods inquiry For those new to sound design research each chapter covers specific research methods that can be utilized directly in order to begin to integrate the methodology into their practice More experienced researchers will find the scope of topics comprehensive and rich in ideas for new lines of inquiry Students and teachers in sound design graduate programs industry based R D experts and audio professionals will find the volume to be a useful guide in developing their skills of inquiry into sound design for any particular application area *Sound Design is the New Score* Danijela Kulezic-Wilson,2020 The practice of blurring the line between score and sound design has transformed contemporary film soundscape by challenging not only the long established hierarchical relationships between dialogue music and sound effects but also the modes of perception shaped by classical soundtrack practices The methods of this new trend rely on the language of contemporary popular and art music producing soundtracks in which it is difficult to tell the difference between score and ambient sound where pieces of electroacoustic music are merged with diegetic sound sound effects are absorbed into the score or treated as music and diegetic sound is treated as musique concrète In Sound Design is the New Score Kulezic Wilson explores theoretical aesthetic and sensuous dimensions of this new trend providing a multifaceted portrait of a practice which recognizes the interconnectedness of all soundtrack elements and emphasizes their inherent musicality The aesthetic concerns of this practice are illuminated through the concept of the aesthetics of reticence which rejects classical narrative and scoring conventions and uses integrated soundtrack strategies to create the space for mystery in art and for individuality in the cinematic experience The book's emphasis on sensuous and musical aspects of this practice informed by the feminist discourse on the erotics of art challenges popular notions about sensory cinema demonstrating that the sensuousness of film form and its soundscapes is more sophisticated than simply being the result of excessive sensory stimulation facilitated by the use of digital technology or the intensified aesthetics it inspires The discussion is supported by a wide range of case studies from American Independent Asian Australian and European cinemas including films by Shane Carruth Claire Denis Hou Hsiao Hsien Harmony Korine David Miché Gus Van Sant and Peter Strickland **The Art of**
