[Polar and Magnetospheric Substorms](#) Syun-Ichi Akasofu,2012-12-06 It has become increasingly clear that the magnetosphere becomes intermittently unstable and explosively releases a large amount of energy into the polar upper atmosphere This particular magnetospheric phenomenon is called the magnetospheric sub storm It is manifested as an activity or disturbance of various polar upper atmospheric phenomena such as intense auroral displays and X ray bursts Highly active conditions in the polar upper atmosphere result from a successive occurrence of such an elementary activity the polar substorm which lasts typically of order one to three hours The concept of the magnetospheric substorm and its manifestation in the polar upper atmosphere the polar substorm has rapidly crystallized during the last few years We can find a hint of such a concept in the term polar elementary storm introduced by Kristian Birkeland as early as 1908 However we are greatly indebted to Sydney Chapman who established the basic foundation of magnetospheric physics and has led researches in this field during the last half century Indeed the terms polar magnetic substorm and auroral substorm were first suggested by Sydney Chapman The concept of the substorm was then soon extended by Neil M Brice of Cornell University and Kinsey A Anderson and his colleagues at the University of California Berkeley who introduced the term magnetospheric substorm We owe many of these recent developments in magnetospheric physics to the great international enterprise the International Geophysical Year IGY and subsequent international cooperative effort IGC IQSY

[Planetary Mineralogy](#) M.R. Lee ,H. Leroux,2015-04-20 This volume of the EMU Notes in Mineralogy is one of the outcomes of a school in planetary mineralogy that was held in Glasgow Scotland in 2014 The school was inspired by the recent advances in our understanding of the nature and evolution of our Solar System that have come from the missions to study and sample asteroids and comets and the very successful Mars orbiters and landers At the same time our horizons have expanded greatly with the discovery of extrasolar protoplanetary disks planets and planetary systems by space telescopes The continued success of such telescopic and robotic exploration requires a supply of highly skilled people and so one of the goals of the Glasgow school was to help build a community of early career planetary scientists and space engineers

Triple Oxygen Isotope Geochemistry Ilya N. Bindeman,Andreas Pack,2021-02-22 Volume 86 of Reviews in Mineralogy and Geochemistry concentrates on understanding the variations among ratios of the three isotopes of oxygen with primary emphasis on terrestrial systems Triple oxygen isotope variations may be related to large mass independent fractionation effects such observed in the Earth atmosphere or may be small and related to minute variations due to purely mass dependent processes

Recent advancements in analytical resolution now allow for the identification of processes and distinct reservoirs that were formerly hidden in the paradigm of a single terrestrial fractionation line. New high resolution measurements are accompanied by advances in theoretical calculations that dovetail with empirical calibrations and applications throughout this volume. 14 chapters span a wide range of subjects from ab initio theoretical approaches to observation of triple oxygen isotope variations in the Earth litho hydro and atmosphere.

Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of the literature concerning all aspects of astronomy astrophysics and their border fields. It is devoted to the recording summarizing and indexing of the relevant publications throughout the world. **Astronomy and Astrophysics Abstracts** is prepared by a special department of the Astronomisches Rechen Institut under the auspices of the International Astronomical Union. Volume 39 records literature published in 1985 and received before August 15 1985. Some older documents which we received late and which are not surveyed in earlier volumes are included too. We acknowledge with thanks contributions of our colleagues all over the world. We also express our gratitude to all organizations observatories and publishers which provide us with complimentary copies of their publications. On account of the introduction of an object index the scope of index information will be considerably enlarged beginning with this volume. In connection with the subject index an additional source to satisfy the needs of retrieval is opened up. Starting with Volume 33 all the recording correction and data processing work was done by means of computers. The recording was done by our technical staff members Ms Helga Ballmann Ms Mona El Choura Ms Monika Kohl Ms Sylvia Matyssek Ms Karin Burkhardt Ms Susanne Schlotelburg and Mr Stefan Wagner supported our task by careful proofreading. It is a pleasure to thank them all for their encouragement. Heidelberg September 1985. The Editors Contents Introduction
