Tyranny Of Testing:

The Tyranny of Testing Banesh Hoffmann, Jacques Barzun, 2003-08-01 Hoffmann's complete and well documented account of the failings and dangers of mechanical testing illustrates the inherent flaws in aptitude and achievement tests. It demonstrates the inadequacies of multiple choice testing in which candidates simply choose answers and need not justify their replies, revealing the tests inclination to reward superficiality rather than subtlety and creativity. Aimed at teachers and others involved in education, this polemic exposes the corporate testing giants whose dubious claims to scientific accuracy shield them from public scrutiny.

The Tyranny of Testing Banesh Hoffmann, 1978-03-09 A critique demonstrating the flaws inherent in standardized testing.

Beyond the Tyranny of Testing Kenneth J. Gergen, Scherto R. Gill, 2020-09-28 Measurement based assessment has dominated our educational systems at the expense of the learning and the well being of students and teachers. In this book Gergen and Gill propose a radical alternative to this broken system which is based instead on an inspirational conception of schools as sites of collective meaning making and a relational orientation to evaluation. The authors acknowledge that it is within the process of relating that the world comes to be meaningful for us and equally learning and well being are embedded in relational process which testing and grades undermine. Providing detailed illustrations using cases from pioneering schools around the globe at both the primary and secondary level, this book demonstrates how a relational orientation to evaluation in education can enhance learning processes, foster students engagement, vitalize relationships, and elevate the evaluation of teaching and the school as a whole. Featuring collaborative learning, dialogic pedagogy, and flexible curricula, relational evaluation truly speaks to the demands of a rapidly changing world.

Drawing on an innovative summer program he developed for fostering creativity, Sternberg shows that the traditional high IQ student typically labeled gifted in our schools often does very poorly when it comes to producing original, insightful ideas. As he shows, because our schools prize almost exclusively the ability to memorize and analyze material, the development of original thinking is given short shrift. Sternberg also looks at the role knowledge of a field, as well as particular styles of thinking, personality, and motivation
