The American Constitutional Tradition H. Lowell Brown,2017-05-24 The book is a work of non fiction The book is a historical analysis of the evolution of a uniquely American constitutionalism that began with the original English royal charters for the exploration and exploitation of North America When the U S Constitution was written in 1787 the accepted conception of a constitution was that of the British constitution upon which the colonists had relied in asserting their rights with respect to the imperium comprised of ancient documents parliamentary enactments administrative regulations judicial pronouncements and established custom Of equal significance the laws comprising the constitution did not differ from other statutes and as a consequence there was no law endowed with greater sanctity than other legislative enactments In framing the revolutionary state constitutions following the retreat of the crown governments in the colonies as well as the later federal Constitution the Revolutionaries fundamentally reconceived a constitution as being the single authoritative source of fundamental law that was superior to all other statutes regulations and judicial decisions that was ratified by the states and that was subject to revision only through a formal amendment process This new constitutional conception has been hailed as the great innovation of the revolutionary period and deservedly so This American constitutionalism had its origins in the now largely overlooked royal charters for the exploration of North America beginning with the charter granted to Sir Humphrey Gilbert by Elizabeth I in 1578 The book follows the development of this constitutional tradition from the early charters of the Virginia Companies and the covenants entered of the New England colonies through the proprietary charters of the Middle Atlantic colonies On the basis of those foundational documents the colonists fashioned governments that came to be comprised not only of an executive but an elected legislature and a judiciary In those foundational documents and in the acts of the colonial legislatures the settlers sought to harmonize their aspirations for just institutions and individual rights with the exigencies and imperatives of an alien and often hostile environment When the colonies faced the withdrawal of the crown governments in 1775 they drew on their experience which

they formalized in written constitutions This uniquely American constitutional tradition of the charters covenants and state constitutions was the foundation of the federal Constitution and of the process by which the Constitution was written and ratified a decade later

Perfecting the Union Max M. Edling, 2020-12-11 For most of the twentieth century the American founding has been presented as a struggle between social classes over issues arising primarily within rather than outside the United States But in recent years new scholarship has instead turned to the international history of the American union to interpret both the causes and the consequences of the US Constitution In *Perfecting the Union* Max M Edling argues that the Constitution was created to defend US territorial integrity and the national interest from competitors in the western borderlands and on the Atlantic Ocean and to defuse inter state tension within the union By replacing the defunct Articles of Confederation the Constitution profoundly transformed the structure of the American union by making the national government more effective But it did not transform the fundamental purpose of the union which remained a political organization designed to manage inter state and international relations And in contrast to what many scholars claim it was never meant to eclipse the state governments The Constitution created a national government but did not significantly extend its remit The result was a dual structure of government in which the federal government and the states were both essential to the people s welfare Getting the story about the Constitution straight matters Edling claims because it makes possible a broader assessment of the American founding as both a transformative event aiming at territorial and economic expansion and as a conservative event aiming at the preservation of key elements of the colonial socio political order
